Annual Budget of Kareeberg Municipality

2013/14 to 2015/16 MEDIUM TERM REVENUE AND EXPENDITURE FORECASTS

<u>VISION</u>

A SUSTAINABLE, AFFORDABLE and DEVELOPMENTAL QUALITY SERVICE for ALL

MISSION

WE WLL ACHIEVE OUR VISION BY ENSURING THAT WE:
Provide a continuous and constant service
Provide a beter level of service for our basket of services
Provide value for money that will be maintained by the municipality
Improve existing infrastructure and create new opportunities for all

Introduction

a Kareeberg Municipality is situated in the western side of the Pixley ka Seme District Municipality in the Northern Cape Province. The district consists of nine municipalities of which Kareeberg is the second smallest.

The municipality was established through the amalgamation of Carnarvon, Vanwyksvlei and Vosburg, as well as a large area of rural farms. The administrative centre is located in Carnarvon with Vanwyksvlei and Vosburg being rural service centres.

The landscape is typical Karoo with an annual average rainfall of 260mm and an annual avaporation of 230mm. There are no constant rivers running through the municipal area and all towns are dependent on ground water.

Local economic opportunities are sadly lacking in the municipal area with the declining economy being largely based on sheep farming. With an unemployment rate of approximately 61% most of the residents rely heavily on the provision of free basic services.

Population growth has been negative by $\pm 4\%$ over the last ten years. The migration of economically active residents to greater urban areas has a huge impact on the population growth. The total population of the municipality is 11 200, which constitutes 3 222 households.

586 households (population 2 814), are resident in the rural areas whilst 2 142 (population 6 683) resides in the urban areas.

- b Kareeberg Municipality has an ongoing consultative process whereby any stakeholder in the municipality can give input for the budgetary process. The municipality has an open door policy so that the Mayor's office, as well as senior management, are available at any time. After each bi-monthly council meeting a community meeting is held where feedback is given by council as well as where inputs by the community are noted. A monthly newsletter, "Die Korbeeltjie", is delivered to each household free of charge wherein the Mayor gives feedback on council activities and asks for inputs on any matter for better service delivery. Advertisements for inputs during the revision of the IDP as well as the budget process were placed in the local newspaper. No inputs were received.
- c This year's Medium Term Revenue and Expenditure Framework is informed by the municipaliy's vision of affordable and sustainable service delivery. This budget has been prepared in line with the requirements as set out in Circulars 51, 54, 55,58, 59, 66 and 67 of National Treasury and complies with the Municipal Budget and Reporting Regulations.
- d Although the municipality will make every effort to collect all revenue due, so that service delivery will not be hampered in any way, the following challenges causes concern:
 - Aging and poorly maintained water, roads and electricity infrastructure;
 - The increased cost of bulk electricity (due to tariff increases from Eskom), which is
 placing upward pressure on service tariffs to residents.
 - Wage increases for municipal staff that continue to exceed consumer inflation

Tariff and property rate increases should be affordable and should generally not exceed inflation as measured by the CPI, except where there are price increases in the inputs of services that are beyond the control of the municipality, for instance the cost of bulk electricity.

BURGEMEESTER

June 2013

1.2 Council Resolutions

On 30 June 2013 the Council of Kareeberg Municipality met in the Council Chambers to consider the annual budget of the municipality for the financial year 2013/14. The Council approved and adopted the following resolutions:

	The Council of Kareeberg Municipality, acting in terms of section 24 of the Municipal Finance
1.	Management Act, (Act 56 of 2003) approves and adopts:
1.1	The annual budget of the municipality for the financial year 2013/14 and the multi-year and single- year capital appropriations as set out in the following tables:
•••	Budgeted Financial Performance (revenue and expenditure by standard classification) as contained
1.1.1	in Table A2 on page 13;
	Budgeted Financial Performance (revenue and expenditure by municipal vote) as contained in Table
1.1.2	A3 on page 14;
	Budgeted Financial Performance (revenue by source and expenditure by type) as contained in Table
1.1.3	A4 on page 16; and
1.1.4	Single-year capital appropriations by municipal vote and standard classification and associated funding by source as contained in Table A5 on page 18.
	The financial position, cash flow budget, cash-backed reserve/accumulated surplus, asset
1.2	management and basic service delivery targets are approved as set out in the following tables:
1.2.1	Budgeted Financial Position as contained in Table A6 on page 19;
1.2.2	Budgeted Cash Flows as contained in Table A7 on page 21;
1.2.3	Cash backed reserves and accumulated surplus reconciliation as contained in Table A8 on page 21;
1.2.4	Asset management as contained in Table A9 on page 23; and
1.2.5	Basic service delivery measurement as contained in Table A10 on page 25.
	The Council of Kareeberg Municipality, acting in terms of section 75A of the Local Government:
2.	Municipal Systems Act (Act 32 of 2000) approves and adopts with effect from 1 July 2013:
2.1	the tariffs for property rates – as set out in Annexure 1,
2.2	the tariffs for electricity – as set out in Annexure 2
2.3	the tariffs for the supply of water – as set out in Annexure 2
2.4	the tariffs for sanitation services – as set out in Annexure 2
2.5	the tariffs for solid waste services – as set out in Annexure 2
	The Council of Kareeberg Municipality, acting in terms of 75A of the Local Government: Municipal
_	Systems Act (Act 32 of 2000) approves and adopts with effect from 1 July 2012 the tariffs for other
3.	services, as set out in Annexure 3.

1.3 Executive Summary

The application of sound financial management principles for the compilation of the municipalit's financial plan is essential and critical to ensure that the municipality remains financially viable and that municipal services are provided sustainably, economically and equitably to all communities.

The main challenges experienced during the compilation of the 2013 - 2014 MTREF can be summarised as follows:

The ongoing difficulties in the national and local economy;

Aging and poorly maintained water, roads and electricity infrastructure;

The increased cost of bulk electricity (due to tariff increases from Eskom), which is placing upward pressure on service tariffs to residents. Continuous high tariff increases are not sustainable - as there will be a point where services will no-longer be affordable;

Wage increases for municipal staff that continue to exceed consumer inflation, as well as the need to fill critical vacancies;

Availability of affordable capital

The following budget principles and guidelines directly informed the compilation of the 2013 - 2014 MTREF:

The 2012/13 Adjustments Budget priorities and targets, as well as the base line allocations contained in that Adjustments Budget were adopted as the upper limits for the new baselines for the 2013/14 annual budget;

Intermediate service level standards were used to inform the measurable objectives, targets and backlog eradication goals;

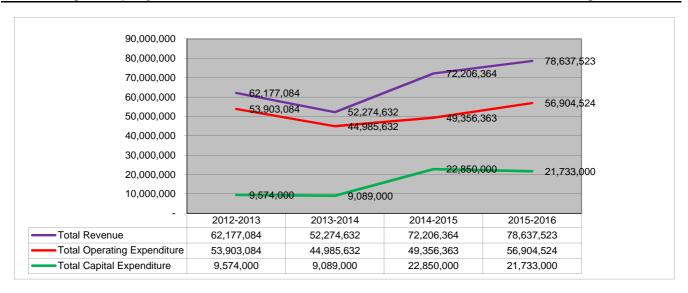

Tariff and property rate increases should be affordable and should generally not exceed inflation as measured by the CPI, except where there are price increases in the inputs of services that are beyond the control of the municipality, for instance the cost of bulk electricity. In addition, tariffs need to remain or move towards being cost reflective, and should take into account the need to address infrastructure backlogs;

There will be no budget allocated to national and provincial funded projects unless the necessary grants to the municipality are reflected in the national and provincial budget and have been gazetted as required by the annual Division of Revenue Act;

In view of the aforementioned, the following table is a consolidated overview of the proposed 2013/14 Mediumterm Revenue and Expenditure Framework:

Table 1 Consolidated Overview of the 2013/14 MTREF

Description	Adjusted Budget 2012/13	Budget Year 2013/14	Budget Year +1 2014/15	Budget Year +2 2015/16
Total Revenue	62,177,084	52,274,632	72,206,364	78,637,523
Total Operating Expenditure	53,903,084	44,985,632	49,356,363	56,904,524
Surplus/(Deficit for the year	8,274,000	7,289,000	22,850,001	21,732,999
Total Capital Expenditure	9,574,000	9,089,000	22,850,000	21,733,000

Total revenue has decreased by 15.63 per cent or R9.9 million for the 2013/14 financial year when compared to the 2012/13 Adjustments Budget. Grant revenue received from Government departments caused the adjustment to the 2012/13 budget. For the two outer years, revenue will increase by 38.13 and 8.78 per cent respectively, equating to a total revenue growth of R 16.3 million over the MTREF when compared to the 2012/13 financial year. The eratic movement is due to changes in municipal infrastructure allocations. Regional Bulk Infrastructure Grant allocated for 2014/15(R 15mil) and 2015/16(R 13.7mil) causes revenue to rocket upwards. Operational revenue increases by R 4.3million(8%) over the MTREF.

Total operating expenditure for the 2013/14 financial year has been appropriated at R44.9 million and translates into a budgeted loss of R1,8 million. Operational expenditure grows by 9.71 per cent from the original 2012/13 budget and by 9.72 and 15.29 per cent for each of the respective outer years of the MTREF. Expenditure increases by R 3million over the MTRF. The value of the assets are already appropriated to the accumulated surplus.

The deficit for the MTREF is caused by depreciation for assets purchased from Government Grants. It would increase expenditure with 4%. Although it is understood that depreciation should be budgeted for, it is also true that the burden on the consumer will increase beyond affordability.

The capital budget constitutes the Municipal Infrastructure Grant allocated in the Division of Revenue Bill and the projects align with the Integrated Development Plan.

1.4 Operating Revenue Framework

For Kareeberg Municipality to continue improving the quality of services provided to its citizens it needs to generate the required revenue. In these tough economic times strong revenue management is fundamental to the financial sustainability of every municipality. The reality is that we are faced with maintenance backlogs and poverty. The expenditure required to address these challenges will inevitably always exceed available funding; hence difficult choices have to be made in relation to tariff increases and balancing expenditures against realistically anticipated revenues.

The municipality's revenue strategy is built around the following key components:

National Treasury's guidelines and macroeconomic policy;

Efficient revenue management, which aims to ensure a 95 per cent annual collection rate for property rates and other key service charges;

Electricity tariff increases as approved by the National Electricity Regulator of South Africa (NERSA);

Achievement of full cost recovery of specific user charges especially in relation to trading services; The municipality's Property Rates By-law approved in terms of the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA);

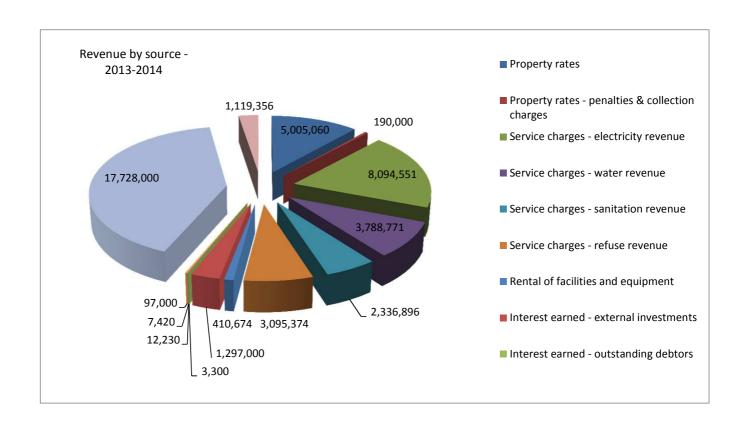

The municipality's Indigent Policy and rendering of free basic services; and

Tariff policies of the municipality

The following table is a summary of the 2013/14 MTREF (classified by main revenue source):

Revenue generated from rates and services charges form a significant percentage of the revenue basket for the municipality. Rates and service charge revenues comprise more than half of the total revenue mix. In the 2012/13 financial year, revenue from rates and services charges totalled R20.6 million. This increases to R22.3 million, R25.8 million and R30.3 million in the respective financial years of the MTREF. This growth can be mainly attributed to the increased share that the sale of electricity contributes to the total revenue mix, which in turn is due to rapid increases in the Eskom tariffs for bulk electricity. The above table includes revenue foregone arising from discounts and rebates associated with the tariff policies of the municipality. Details in this regard are contained in MBRR SA1 (see pages 89 and 90).

In line with the formats prescribed by the Municipal Budget and Reporting Regulations, capital transfers and contributions are excluded from the operating statement, as inclusion of these revenue sources would distort the calculation of the operating surplus/deficit.

Operating grants and transfers total R27.3 million in the 2012/13 financial year. Operating grants constitute 41%, 37.64% and 37.98% of the MTREF, starting with the 2013-2014 budget. The following table gives a breakdown of the various operating grants and subsidies allocated to the municipality over the medium term:

Tariff-setting is a pivotal and strategic part of the compilation of any budget. When rates, tariffs and other charges were revised, local economic conditions, input costs and the affordability of services were taken into account to ensure the financial sustainability of the municipality.

National Treasury continues to encourage municipalities to keep increases in rates, tariffs and other charges as low as possible. Excessive increases are likely to be counterproductive, resulting in higher levels of non-payment

It must also be appreciated that the consumer price index, as measured by CPI, is not a good measure of the cost increases of goods and services relevant to municipalities. The basket of goods and services utilised for the calculation of the CPI consist of items such as food, petrol and medical services, whereas the cost drivers of a municipality are informed by items such as the cost of remuneration, bulk purchases of electricity and water, petrol, diesel, chemicals, cement etc.

The tariff setting process relating to service charges is set out as follows.

Property Rates

- The first R15 000 of the market value of a property used for residential purposes is excluded from the rate-able value (Section 17(h) of the MPRA).
- The rating of agricultural properties have been phased in. The ratio for these properties have been set at 1 : 0.100.

The second valuation roll will be implemented from 1 July 2013. An increase of 25% is expected in the valuation.

Tariffs wil decrease by 28% for all owners except agriculture, who's tariffs will increase by 9.48%. Rate payers will be affected according to the percentage increase in valuation. Some will pay môre than the previous year and others will pay less.

- Council affords agriculture a further rebate for the following criteria:
 - 5% if no municipal road borders the property;
 - 5% if no sewarage is connected to the property
 - 5% if the municipality does not supply elictricity to the property
 - 5% if the municipality does not supply water to the property
 - 5% if the municipality does not supply refuse removal to the property
 - 5% if the owner contributes substantially to job creation
 - 5% if the owner supplies acceptable standard of water services to the farm workers
- The Municipality may award a 100 per cent grant-in-aid on the assessment rates of rate-able properties of certain classes such as official places of worship, registered welfare organizations, institutions or organizations performing charitable work, sports grounds used for purposes of amateur sport as well as for State infrastructure.

The categories of rate-able properties for purposes of levying rates and the proposed rates for the 2013/14 financial year is contained below:

Table 5 Comparison of proposed rates to be levied for the 2013/14 financial year

Category	Current tariff (1 July 2012)	Proposed tariff (1 July 2013)	% increase/ (decrease)
	С	С	
Residential properties	1.760	1.267	-28.00
Business & Commercial	1.760	1.267	-28.00
Industrial	1.760	1.267	-28.00
State owned properties	3.520	2.534	-28.01
Agricultural	0.116	0.127	9.48
Municipal rateable	0.968	0.697	-28.00
Public Service Infrastructure	0.440	0.317	-27.95
Places of Worship	1.760	1.267	-28.01
Public benefit organisation properties	1.760	1.267	-28.00

Sale of Water and Impact of Tariff Increases

Table 6 Proposed Water Tariffs

Category	Current tariff tariff (1 July 2012) (1 July 2018) (1 July 2018) Rand	% increase
Basic charge	110.38 11	7.00 6.00
Tariff per kiloliter		
0 to 6 kℓ	0.99	1.05 6.06
7 to 20 kℓ	1.19	1.26 5.88
21 to 50 kℓ	2.81	2.98 6.05
51 kℓ +	5.10	5.41 6.08

Registered indigents will be awarded one basic levy as well as 10kl water consumption per month.

Sale of Electricity and Impact of Tariff Increases

NERSA has announced the revised bulk electricity pricing structure. A 7.3 per cent increase in the Eskom bulk electricity tariff to municipalities will be effective from 1 July 2013. Considering the Eskom increases, the consumer tariff had to be increased by 7 per cent to offset the additional bulk purchase cost from 1 July 2013. Furthermore, it should be noted that given the magnitude of the tariff increase, it is expected to depress growth in electricity consumption, which will have a negative impact on the municipality's revenue from electricity. NERSA will only accommodate a 7% increase in tafiffs.

It should further be noted that NERSA has advised that a stepped tariff structure needs to be implemented from 1 July 2011. The effect thereof will be that the higher the consumption, the higher the cost per kWh. The aim is to subsidise the lower consumption users (mostly the poor). National Treasury has however postponed the tariff structure. This afforded the municipality sufficient time to gather enough statistics for implementation by 1 July 2012. However, to retain a fixed amount of income, council decided to maintain a basic charge for users of conventional meters.

Table 7 Proposed Electricity Tariffs

Category	Current tariff (1 July 2012)	l tariff	% increase
	Rand	Rand	
Basic charge	95.00	102.60	8.00
Tariff - conventional			
0 - 50kWh	0.6	0.650	6.56
51 - 350kWh	0.7	0.820	6.49
351 - 600kWh	1.04	1.110	6.73
>600kWH	1.24	1.330	7.26
Commercial >2 000kWh	0.80	0.856	7.00
Tariff - prepaid			
0 - 50kWh	0.60	0.700	6.06
51 - 350kWh	0.82	0.870	6.10
351 - 600kWh	1.09	1.170	7.34
>600kWH	1.29	1.380	6.98

Residential households will now pay a basic charge of R 102.60 per month.

Commercial users wil pay a basic charge of R 535.00 per month.

Registered indigents will again be granted 50 kWh per month free of charge.

Sanitation and Impact of Tariff Increases

Table 8 Comparison between current sanitation charges and increases

Category			Current tariff (1 July 2012)	Proposed tariff (1 July 2013)	% increase
			Rand	` Rand ´	
Nightsoil	joint septic tanks	Vosburg	95.35	101.06	5.99
Sewerage	waterborne	Carnarvon	182.80	193.77	6.00
Sewerage	domestic		133.78	141.81	6.00
Sewerage	government		197.12	208.95	6.00

Free sanitation will be applicable to registered indigents

Table 9 Waste Removal and Impact of Tariff Increases

Category	Current tariff (1 July 2012)	Proposed tariff (1 July 2013)	% increase
	Rand	Rand	
Refuse removal One removal per week possible bags per quarter	26 refuse 118.12	125.21	6.00
Garden waste removal	161.34	171.02	6.00

Free refuse removal will be applicable to registered indigents

Overall impact of tariff increases on households

The following table shows the overall expected impact of the tariff increases on a large and small household, as well as an indigent household receiving free basic services. Indigent users are only responsible for over use of electricity and water. A 25% increase in the valuation was assumed.

The budgeted allocation for employee related costs for the 2013/14 financial year totals R13.9 million, which equals 30.9 per cent(29.15 in 2012/13) of the total operating expenditure. The second year of the salary and wage agreement will be implimented 1 July 2013. A 7 per cent increase for the outer years were budgeted for.

The wage curve agreement has been implimented, which resulted in an increase of 14.07 per cent in employee related costs.

The cost associated with the remuneration of councillors is determined by the Minister of Co-operative Governance and Traditional Affairs in accordance with the Remuneration of Public Office Bearers Act, 1998 (Act 20 of 1998). The most recent proclamation in this regard has been taken into account in compiling the municipality's budget. In an effort to cap tariff increases at six persent, council gecided to forfeit the increase in remuneration. No increase has been budgeted for.

The provision of debt impairment was determined based on an annual collection rate of 95 per cent and the fact that indigents are sudsidised fully. A payment rate of more than 100 per cent is expected, therefore the low provision for the MTREF.

Provision for depreciation and asset impairment has been informed by the Municipality's Asset Management Policy. Budget appropriations in this regard total R1.9 million for the 2013/14 financial year and equates to 4.3 per cent of the total operating expenditure.

Bulk purchases are directly informed by the purchase of electricity from Eskom. The annual price increases have been factored into the budget appropriations and directly inform the revenue provisions. The expenditures include distribution losses.

Other materials as well as contracted services comprises the cost of repairs and maintenance. Although this strategic imperative remains a priority with council, cash flow constraints hamper proper repairs and maintenance. National Treasury requires that repairs and maintenance should not be less than 8 per cent of the write down value of excisting property plant and equipment. The municipality,s figure is only 1.00 per cent. The assurance is given that repairs and maintenance will be done as needed.

The budgeted cost of free basic services for 2013-2014 is R 7 535 741. The number of households budgeted for remain the same at 1 367.

Other expenditure comprises of various line items relating to the daily operations of the municipality. This group of expenditure has also been identified as an area in which cost savings and efficiencies can be achieved. Growth has been limited to 13.38 per cent for 2013/14.

Free Basic Services: Basic Social Services Package

The social package assists households that are poor or face other circumstances that limit their ability to pay for services. To receive these free services the households are required to register in terms of the municipality's Indigent Policy. The registration of indigents are reviewed quarterly. Detail relating to free services, cost of free basis services, revenue lost owing to free basic services as well as basic service delivery measurement is contained in MBRR A10 (Basic Service Delivery Measurement) on pages 29 and 30.

The cost of the social package of the registered indigent households is financed by national government through the local government equitable share received in terms of the annual Division of Revenue Act.

1.6 Capital expenditure

Upgrading of sports facilities in Carnarvon will be priority during 2013/14 budget. The rest of the budget will be utilised for upgrading of streets and establishment of new cemetries in Vanwyksvlei and Vosburg. This will also be the only new capital for the year. Connecting water to Vanwyksvlei will be a new capital project implimented over two years. It will be funded through Regional Bulk Infrastructure Grant and will amount to R 29.7 million.

Further detail relating to asset classes and proposed capital expenditure is contained in MBRR A9 (Asset Management) on pages 27 and 28. In addition to the MBRR Table A9, MBRR Tables SA34a, b, c and d provides a detailed breakdown of the capital programme relating to new asset construction, capital asset renewal as well as operational repairs and maintenance by asset class.

Furthermore MBRR Table SA36 contains a detailed breakdown of the capital budget per project over the medium-term.

1.7 Annual Budget Tables

The following eighteen pages present the ten main budget tables as required in terms of section 8 of the Municipal Budget and Reporting Regulations. These tables set out the municipality's 2013/14 budget and MTREF as approved by the Council. Each table is accompanied by explanatory notes.

Explanatory notes to MBRR Table A1 - Budget Summary

- 1. Table A1 is a budget summary and provides a concise overview of the municipality's budget from all of the major financial perspectives (operating, capital expenditure, financial position, cash flow, and MFMA funding compliance).
- 2. The table provides an overview of the amounts approved by Council for operating performance, resources deployed to capital expenditure, financial position, cash and funding compliance, as well as the municipality sommitment to eliminating basic service delivery backlogs.
- 3. Financial management reforms emphasises the importance of the municipal budget being funded. This requires the simultaneous assessment of the Financial Performance, Financial Position and Cash Flow Budgets, along with the Capital Budget. The Budget Summary provides the key information in this regard:
 - a. The operating surplus/deficit (after Total Expenditure) is negative over the MTREF due to depreciation of assets from Government Grants not being provided for as cash
 - b. Capital expenditure is balanced by capital funding sources, of which

Transfers recognised is reflected on the Financial Performance Budget;

- 4. The Cash backing/surplus reconciliation shows that the municipality anticipates cash backing to be adequate over the MTREF
- 5. Even though the Council is placing great emphasis on securing the financial sustainability of the municipality, this is not being done at the expense of services to the poor. The section of Free Services shows that the amount spent on Free Basic Services and the revenue cost of free services provided by the municipality continues to increase.
- 6.Census 2011 figures include households from rural farm areas where the municipality has no jurisdiction.

Explanatory notes to MBRR Table A2 - Budgeted Financial Performance (revenue and expenditure by standard classification)

- 1. Table A2 is a view of the budgeted financial performance in relation to revenue and expenditure per standard classification. The modified GFS standard classification divides the municipal services into 15 functional areas. Municipal revenue, operating expenditure and capital expenditure are then classified in terms of each of these functional areas which enables the National Treasury to compile "whole of government" reports.
- 2. Note the Total Revenue on this table includes capital revenues (Transfers recognised capital) and so does not balance to the operating revenue shown on Table A4.
- 3. Note that as a general principle the revenues for the Trading Services should exceed their expenditures. The table highlights that this is the case for all functions except electricity. Electricity shows a negative growth and will be operated at a loss, with greater preasure on the other trading service tariffs. An effort should be made to gradually increase electricity tariffs to eventually make an operating surplus.
- 4. Other functions that show a deficit between revenue and expenditure are being financed from rates revenues and surpluses generated from trading services.

Explanatory notes to MBRR Table A3 - Budgeted Financial Performance (revenue and expenditure by municipal vote)

1. Table A3 is a view of the budgeted financial performance in relation to the revenue and expenditure per municipal vote. This table facilitates the view of the budgeted operating performance in relation to the organisational structure of the municipality. This means it is possible to present the operating surplus or deficit of a vote. The following table is an analysis of the surplus or deficit for the electricity and water trading services.

Table 12 Surplus/(Deficit) calculations for the trading services

Percentage Surplus/(Deficit)	12.7%	78.1%	78.6%	24.3%	24.3%	21.7%	19.2%	18.2%	17.4%		

Electricity shows a deficit of 1 per cent ranging to a deficit of 0.9 per cent, whereafter a surplus of 4 per cent is anticipated by 2014/15. This is primarily as a result of the high increases in Eskom bulk purchases as well as the restrictions placed on tariff increases by NERSA.

National Treasury as well as Nersa will have to take note of this situation. Where electricity for one, was used to subsidise other community services, it will be left to other trading services to subsidise those services.

The surplus on the water account remains relatively constant over the MTREF translating into a surplus of 78.1 per cent, 77.9 per cent and 74.1 per cent for each of the respective financial years.

Wastewater also has a fairly constant surplus over the MTREF.

Refuse removal anticipates a surplus decrease from 19.2% in 2013/14 to 17.4% in 2015/16. Note should be taken that the percentage surplus has decreased from 2012/13 budget.

All trade services show a decrease in surplus over the MTREF. This should be noted, for tariffs will either have to be increased more than inflation, or expenses will have to be curbed at less than inflation. It will become impossible for municipalities to deliver an affordable service to consumers.

Increase in expenditure such as employee related costs, bulk purchases, fuel and other services are growing more rapidly than inflation.

Explanatory notes to Table A4 - Budgeted Financial Performance (revenue and expenditure)

1. Total revenue is R43.1 million in 2013/14 and escalates to R56.9 million by 2014/15. This represents a year-onyear increase of 14.29 per cent for the 2014/15 financial year and 15.29 per cent for the 2015/16 financial year.

June 2013 19

^{2.} Revenue to be generated from property rates is R5 million in the 2013/14 financial year and increases to R6.7 million by 2015/16 which represents 11.5 per cent of the operating revenue base of the municipality and therefore remains a significant funding source. Tariff increases have been factored in at 20 per cent and 10 per cent for each of the outer years of the MTREF.

- 3. Service charges relating to electricity, water, sanitation and refuse removal constitutes the biggest component of the revenue basket of the municipality totalling R17.3 million for the 2013/14 financial year and increasing to R23.6 million by 2015/16. For the 2013/14 financial year service charges amount to 40 per cent of the total revenue base and grows by 3 and 5 per cent per annum over the medium-term. This growth can mainly be attributed to the increase in the bulk price of electricity.
- 4. Transfers recognised operating includes the local government equitable share and other operating grants from national and provincial government. It needs to be noted that in real terms the grants receipts from national government are declining as a percentage of total revenue over the MTREF from 41.08 per cent to 37.98 per cent in 2015/16. The percentage share of this revenue source declines due to the more rapid relative growth in service charge revenues. It still remains the second highest source of cash income for the municipality. This means that the municipality becomes more dependant on Government for funding of operational costs.

Bulk purchases have significantly increased over the 2009/10 to 2015/16 period escalating from R3.6 million to R11.4 million. These increases can be attributed to the substantial increase in the cost of bulk electricity from Eskom.

Explanatory notes to Table A5 - Budgeted Capital Expenditure by vote, standard classification and funding source 1. Table A5 is a breakdown of the capital programme in relation to capital expenditure by municipal vote (multiyear and single-year appropriations); capital expenditure by standard classification; and the funding sources necessary to fund the capital budget, including information on capital transfers from national and provincial departments.

2. Single-year capital expenditure has been appropriated at R9.08 million for the 2013/14 financial year and remains relatively constant over the MTREF at levels of R7.85 million and R8.03 million respectively for the two outer years. Further capital funding have been appropriated for the outer years from the Regional Bulk Infrastructure Grant. This has been earmarked for water supply for Vanwyksvlei.

June 2013 21 3. Unlike multi-year capital appropriations, single-year appropriations relate to expenditure that will be incurred in the specific budget year such as the procurement of vehicles and specialized tools and equipment. The budget appropriations for the two outer years are indicative allocations based on the departmental business plans as informed by the IDP and will be reviewed on an annual basis to assess the relevance of the expenditure in relation to the strategic objectives and service delivery imperatives of the municipality. For the purpose of funding assessment of the MTREF, these appropriations have been included but no commitments will be incurred against single-year appropriations for the two outer-years.

5. The capital programme is funded from national and provincial grants and transfers.

Explanatory notes to Table A6 - Budgeted Financial Position

- 1. Table A6 is consistent with international standards of good financial management practice, and improves understandability for councillors and management of the impact of the budget on the statement of financial position (balance sheet).
- 2. This format of presenting the statement of financial position is aligned to GRAP1, which is generally aligned to the international version which presents Assets less Liabilities as "accounting" Community Wealth. The order of items within each group illustrates items in order of liquidity; i.e. assets readily converted to cash, or liabilities immediately required to be met from cash, appear first.
- 3. MBRR Table A6 is supported by an extensive table of notes (SA3 which can be found on pages 64, 65 and 66) providing a detailed analysis of the major components of a number of items, including:
 - Call investments deposits;
 - Consumer debtors;
 - Property, plant and equipment;
 - Trade and other payables;
 - Provisions non current;
 - Changes in net assets; and
 - Reserves
- 4. The municipal equivalent of equity is Community Wealth/Equity. The justification is that ownership and the net assets of the municipality belong to the community.
- 5. Any movement on the Budgeted Financial Performance or the Capital Budget will inevitably impact on the Budgeted Financial Position. As an example, the collection rate assumption will impact on the cash position of the municipality and subsequently inform the level of cash and cash equivalents at year end. Similarly, the collection rate assumption should inform the budget appropriation for debt impairment which in turn would impact on the provision for bad debt. These budget and planning assumptions form a critical link in determining the applicability and relevance of the budget as well as the determination of ratios and financial indicators. In addition the funding compliance assessment is informed directly by forecasting the statement of financial position.

Explanatory notes to Table A7 - Budgeted Cash Flow Statement

- 1. The budgeted cash flow statement is the first measurement in determining if the budget is funded.
- 2. It shows the expected level of cash in-flow versus cash out-flow that is likely to result from the implementation of the budget.
- 3. It can be seen that the cash levels of the municipality fell significantly over the 2009/10 to 2010/11 period owing directly to a net decrease in cash for the 2009/10 financial year of R5.8 million and R8.1 million for the 2010/11 financial year. This was mainly due to unspending of conditional grants.
- 4. The approved 2013/14 MTREF provide for a net decrease in cash of R1.6 million for the 2013/14 financial year, while it increases for the outer years.

Explanatory notes to Table A8 - Cash Backed Reserves/Accumulated Surplus Reconciliation

- 1. The cash backed reserves/accumulated surplus reconciliation is aligned to the requirements of MFMA Circular 42 Funding a Municipal Budget.
- 2. In essence the table evaluates the funding levels of the budget by firstly forecasting the cash and investments at year end and secondly reconciling the available funding to the liabilities/commitments that exist.
- 3. The outcome of this exercise would either be a surplus or deficit. A deficit would indicate that the applications exceed the cash and investments available and would be indicative of non-compliance with the MFMA requirements that the municipality's budget must be "funded".
- 4. Non-compliance with section 18 of the MFMA is assumed because a shortfall would indirectly indicate that the annual budget is not appropriately funded.
- 5. From the table it can be seen that for the period 2009/10 to 2015/16 the surplus grows from R5.7 million to R15.3 million.
- 6. As part of the budgeting and planning guidelines that informed the compilation of the 2013/14 MTREF the end objective of the medium-term framework was to ensure the budget is funded aligned to section 18 of the MFMA.

Explanatory notes to Table A9 - Asset Management

- 1. Table A9 provides an overview of municipal capital allocations for providing for new assets and the renewal of existing assets, as well as spending on repairs and maintenance by asset class.
- 2. National Treasury has recommended that municipalities should allocate at least 40 per cent of their capital budget to the renewal of existing assets, and allocations to repairs and maintenance should be 8 per cent of PPE. The municipality meets the first recommendation, but fails to do so with repairs and maintenance.

Explanatory notes to Table A10 - Basic Service Delivery Measurement

- 1. Table A10 provides an overview of service delivery levels, including backlogs (below minimum service level), for each of the main services.
- 2. The municipality has no significant backlogs
- a. Water services Every citizen has at least RDP services.
- b. Sanitation services the backlog has increased to 160 households. These buckets are used in the informal settlements.
- c. Electricity services the backlog has increased to 160 households. These households are situated in an Eskom distribution area. Where electricity can not be provided, wood and paraffin is provided as fuel.
- d. Refuse services No backlogs are encountered with this service.
- 3. The budget provides for 1 367 households to be registered as indigent in 2013/14, and therefore entitled to receiving Free Basic Services. A few poor people may migrate into the municipal area, but it will have no significant influence.
- 4. It is anticipated that these Free Basic Services will cost the municipality R5.8 million in 2013/14, increasing to R7.3 million in 2015/16. This is covered by the municipality's equitable share allocation from National Government.

Part 2 - Supporting Documentation

2.1 Overview of the annual budget process

Section 53 of the MFMA requires the Mayor of the municipality to provide general political guidance in the budget process and the setting of priorities that must guide the preparation of the budget. In addition Chapter 2 of the Municipal Budget and Reporting Regulations states that the Mayor of the municipality must establish a Budget Steering Committee to provide technical assistance to the Mayor in discharging the responsibilities set out in section 53 of the Act.

The Budget Steering Committee consists of the Municipal Manager and management of the municipality meeting under the chair of the Mayor.

The primary aim of the Budget Steering Committee is to ensure that the process followed to compile the budget complies with legislation and good budget practices; that there is proper alignment between the policy and service delivery priorities set out in the municipality's IDP and the budget, taking into account the need to protect the financial sustainability of municipality; that the municipality"s revenue and tariff setting strategies ensure that the cash resources needed to deliver services are available; and that the various spending priorities of the different municipal departments are properly evaluated and prioritised in the allocation of resources.

that the process followed to compile the budget complies with legislation and good budget

- practices;
 - that there is proper alignment between the policy and service delivery priorities set out in the municipality's IDP and the budget, taking into account the need to protect the financial sustainability
- of municipality;
 - that the municipality's revenue and tariff setting strategies ensure that the cash resources needed
- to deliver services are available; and
 - that the various spending priorities of the different municipal departments are properly evaluated
- and prioritised in the allocation of resources.

2.1.1 Budget Process Overview

In terms of section 21 of the MFMA the Mayor is required to table in Council ten months before the start of the new financial year (i.e. in August 2012) a time schedule that sets out the process to revise the IDP and prepare the budget.

The Mayor tabled in Council the required budget time schedule on 17 August 2012. Key dates applicable to the process were:

By 31 August 2012 - Table before council the schedule of key deadlines for the 2013 - 2014 budget

By 30 November 2012 - Budget Steering Committee meeting

- Revise the IDP

Workshop with heads of departmentAsk inputs from the community

By 31 January 2013 - Budget Steering Committee meeting

- Budget for salaries and wages

- Identify capital projects from the IDP

By 28 February 2013 - Budget Steering Committee meeting

Compile draft budgetSet preliminary tariffs

- Review budget related policies

- Finalise the IDP

- Make cash flow projections

Finalise the PMS(Measurable Performanc Objectives)

Compile the SDBIP

By 31 March 2013 - Budget Steering Committee meeting

- Table the draft budget

- Prepare and send Treasury questionnaires

By 30 April 2013 - Budget Steering Committee meeting

- Consider Treasury and other input/ objections

By 31 May 2013 - Budget Steering Committee meeting

- Finalise the community participation process

- Table the budget for adoption

- Table the SDBIP to be noted by council

Adopt the budgetAdopt the IDP

- Adopt amendments to budget related policies

By 30 June 2013 - Mayor approves SDBIP

-All performance management contracts completed

and signed

- Prepare and send Treasury questionnaires

2.1.2 IDP and Service Delivery and Budget Implementation Plan

The municipality's IDP is its principal strategic planning instrument, which directly guides and informs its planning, budget, management and development actions. This framework is rolled out into objectives, key performance indicators and targets for implementation which directly inform the Service Delivery and Budget Implementation Plan. IDP planning links back to priority needs and master planning, and essentially informed the detail operating budget appropriations and three-year capital programme.

2.1.3 Financial Modelling and Key Planning Drivers

The following key factors and planning strategies have informed the compilation of the 2013/14 MTREF:

- Policy priorities and strategic objectives
- Asset maintenance
- Economic climate and trends (i.e inflation, Eskom increases, household debt)
- The approved 2012/13 adjustments budget and performance against the SDBIP
- Cash Flow Management Strategy
- Debtor payment levels
- The need for tariff increases versus the ability of the community to pay for services;
- Improved and sustainable service delivery

2.1.4 Community Consultation

The draft 2013/14 MTREF was only tabled before council on 2 April 2013. Thus all documentation was submitted late to those concerned.

The draft 2013/14 MTREF, as tabled before Council on 2 April 2013 for community consultation, was published on the municipality's website, and hard copies were made available at each of the three offices in Carnarvon, Vanwyksvlei and Vosburg.

All documents in the appropriate format (electronic and printed) were provided to National Treasury, and other national and provincial departments in accordance with section 23 of the MFMA, to provide an opportunity for them to make comments.

2.2 Overview of alignment of annual budget with IDP

The Constitution mandates local government with the responsibility to exercise local developmental and cooperative governance. The eradication of imbalances in South African society can only be realized through a credible integrated developmental planning process. Municipalities in South Africa need to utilise integrated development planning as a method to plan future development in their areas and so find the best solutions to achieve sound long-term development goals. A municipal IDP provides a five year strategic programme of action aimed at setting short, medium and long term strategic and budget priorities to create a development platform, which correlates with the term of office of the political office bearers. The plan aligns the resources and the capacity of a municipality to its overall development aims and guides the municipal budget. An IDP is therefore a key instrument which municipalities use to provide vision, leadership and direction to all those that have a role to play in the development of a municipal area. The IDP enables municipalities to make the best use of scarce resources and speed up service delivery.

Integrated developmental planning in the South African context is amongst others, an approach to planning aimed at involving the municipality and the community to jointly find the best solutions towards sustainable development. Furthermore, integrated development planning provides a strategic environment for managing and guiding all planning, development and decision making in the municipality.

It is important that the IDP developed by municipalities correlate with National and Provincial intent. It must aim to co-ordinate the work of local and other spheres of government in a coherent plan to improve the quality of life for all the people living in that area. Applied to the municipality, issues of national and provincial importance should be reflected in the IDP. A clear understanding of such intent is therefore imperative to ensure that the municipality strategically complies with the key national and provincial priorities.

The aim of this revision cycle was to develop and coordinate a coherent plan to improve the quality of life for all the people living in the area, also reflecting issues of national and provincial importance. One of the key objectives is therefore to ensure that there exists alignment between national and provincial priorities, policies and strategies and the municipality's response to these requirements.

The national and provincial priorities, policies and strategies of importance include amongst others:

- Green Paper on National Strategic Planning of 2009;
- Government Programme of Action;
- Development Facilitation Act of 1995;
- Provincial Growth and Development Strategy (GGDS);
- National and Provincial spatial development perspectives;
- Relevant sector plans such as transportation, legislation and policy;
- National Key Performance Indicators (NKPIs);
- Accelerated and Shared Growth Initiative (ASGISA);
- National 2014 Vision;
- National Spatial Development Perspective (NSDP) and
- The National Priority Outcomes.

The Constitution requires local government to relate its management, budgeting and planning functions to its objectives. This gives a clear indication of the intended purposes of municipal integrated development planning. Legislation stipulates clearly that a municipality must not only give effect to its IDP, but must also conduct its affairs in a manner which is consistent with its IDP.

The following table highlights the IDP's five strategic objectives for the 2013/14 MTREF and further planning refinements that have directly informed the compilation of the budget:

2.3.1 Performance indicators and benchmarks

2.3.1.1 Borrowing Management

The municipality does not foresee any borrowing during the MTREF.

2.3.1.2 Safety of Capital

Gearing: no borrowing will be undertaken.

2.3.1.3 Liquidity

Current ratio is a measure of the current assets divided by the current liabilities. For the 2013/14 MTREF the current ratio is 5.4 in the 2013/14 financial year and 4.6 and 5.1 for the two outer years of the MTREF. Going forward it will be necessary to maintain these levels.

The liquidity ratio is a measure of the ability of the municipality to utilize cash and cash equivalents to erase or redeem its current liabilities immediately. Ideally the municipality should have the equivalent cash and cash equivalents on hand to meet at least the current liabilities, which should translate into a liquidity ratio of 1. Anything below 1 indicates a shortage in cash to meet creditor obligations. For the 2013/14 financial year the projected ratio is4.2 declining to 3.4 in the 2015/16 financial year.

2.3.1.4 Revenue Management

The revenue value chain must be streamlined by ensuring accurate billing, customer service, credit control and debt collection.

2.3.1.5 Creditors Management

The municipality has managed to ensure that creditors are settled within the legislated 30 days of invoice. By applying daily cash flow management the municipality has managed to ensure a 100 per cent compliance rate to this legislative obligation.

2.3.1.6 Other Indicators

The electricity distribution losses remain fairly constant since 2009/10. The initiatives to ensure these targets are achieved include managing illegal connections and theft of electricity. The energy losses budgeted for is 12.96%. Employee costs as a percentage of operating revenue is declining over the MTREF. This is primarily owing to the high increase in bulk purchases which directly increase revenue levels, as well as increased allocation relating to operating grants and transfers.

Rrepairs and maintenance as percentage of operating revenue remains fairly constant over the MTREF.

2.3.2 Free Basic Services: basic social services package for indigent households

The social package assists residents that have difficulty paying for services and are registered as indigent households in terms of the Indigent Policy of the Municipality. Only registered indigents qualify for the free basic services.

For the 2013/14 financial year 1 367 registered indigents have been provided for in the budget. In terms of the municipality's indigent policy registered households are entitled to 10kl free water, 50 kwh of electricity, 1 sanitation removal and free waste removal once a week, as well as a discount on their property rates.

Further detail relating to the number of households receiving free basic services, the cost of free basic services, highest level of free basic services as well as the revenue cost associated with the free basic services is contained in MBRR Table A10 (Basic Service Delivery Measurement) on pages 29 and 30.

Note that the number of households in informal areas that receive free services and the cost of these services (e.g. the provision of water through stand pipes, etc) are not taken into account in the table noted above.

2.4 Overview of budget related-policies

2.4.1 Review of credit control and debt collection procedures/policies

2.5 Overview of budget assumptions

2.5.1 External factors

Due to the economic slowdown, financial resources are limited due to reduced payment levels by consumers. This has resulted in declining cash inflows, which has necessitated restrained expenditure to ensure that cash outflows remain within the affordability parameters of the municipality's finances.

2.5.2 General inflation outlook and its impact on the municipal activities

There are five key factors that have been taken into consideration in the compilation of the 2013/14 MTREF:

- National Government macro economic targets;
- The general inflationary outlook and the impact on municipality's residents and businesses;
- The impact of municipal cost drivers;
- The increase in prices for bulk electricity; and
 - The increase in the cost of remuneration.

Employee related costs comprise 30.93 per cent of total operating expenditure in the 2013/14 MTREF and therefore this increase above inflation places a disproportionate upward pressure on the

expenditure budget. The categorisation and job evaluation wage curves collective agreement signed on 21 April 2010 must be noted. This caused an increase of 12.98 per cent in employee related costs from 2012/13 to 2013/14. The collective agreement for local government allows for salary increases of 6.85 percent for 2013/14 year and 6.4 percent for the 2014/15 year. It is, however prudent to budget for a 7 per cent increase over the MTREF.

2.5.3 Collection rate for revenue services

The base assumption is that tariff and rate increases will increase at a rate slightly higher that CPI over the long term. It is also assumed that current economic conditions, and relatively controlled inflationary conditions, will continue for the forecasted term.

The rate of revenue collection is currently expressed as a percentage (73 per cent) of annual billings. Cash flow is assumed to be 73 per cent of billings, plus an increased collection of arrear debt from the revised collection and credit control policy. The performance of arrear collections will however only be considered a source of additional cash in-flow once the performance has been carefully monitored.

2.5.4 Salary increases

The collective agreement for local government allows for salary increases of 6.84 percent for 2013/14 year and 6.4 percent for the 2014/15 year.

2.5.5 Ability of the municipality to spend and deliver on the programmes

It is estimated that a spending rate of 100 per cent is achieved on operating expenditure as well as on the capital programme for the 2013/14 MTREF of which performance has been factored into the cash flow budget.

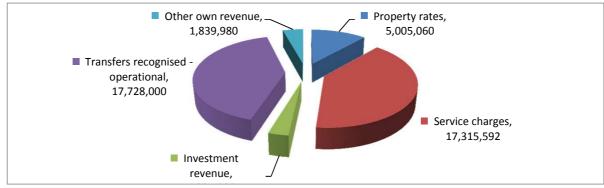

2.6 Overview of budget funding

2.6.1 Medium-term outlook: operating revenue

Table 14 Breakdown of the operating revenue over the medium-term:

2.6.3 Cash Flow Management

Cash flow

- Clear separation of receipts and payments within each cash flow category; and
- Clear separation of capital and operating receipts from government, which also enables cash from "Ratepayers and other" to be provided for as cash inflow based on actual performance. In other words the actual collection rate of billed revenue.

Cash/cash equivalents at the year begin:	35,102,816	29,252,274	21,147,362	21,602,265	21,602,265	21,602,265	21,602,265	22,672,329	21,089,393	21,712,568
	29,252,274	21,147,362	21,602,265	22,672,329	22,672,329	22,672,329	22,672,329	21,089,393	21,712,568	22,542,624

If the assumptions realise, cash flow will remain fairly constant over the MTREF.

2.6.4 Cash Backed Reserves/Accumulated Surplus Reconciliation

This following table meets the requirements of MFMA Circular 42 which deals with the funding of a municipal budget in accordance with sections 18 and 19 of the MFMA. The table seeks to answer three key questions regarding the use and availability of cash:

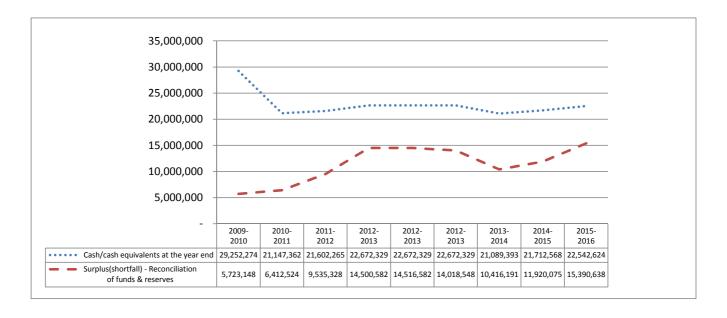

- What are the predicted cash and investments that are available at the end of the budget year?
- How are those funds used?
- What is the net funds available or funding shortfall?

A surplus would indicate the cash-backed accumulated surplus that was/is available. A shortfall (applications > cash and investments) is indicative of non-compliance with section 18 of the MFMA requirement that the municipality"s budget must be "funded". Non-compliance with section 18 is assumed because a shortfall would indirectly indicate that the annual budget is not appropriately funded (budgeted spending is greater than funds available or to be collected). It is also important to analyse trends to understand the consequences, e.g. the budget year might indicate a small surplus situation, which in itself is an appropriate outcome, but if in prior years there were much larger surpluses then this negative trend may be a concern that requires closer examination.

MBRR Table A8 - Cash backed reserves/accumulated surplus reconciliation

The following graph supplies an analysis of the trends relating to cash and cash equivalents and the cash backed reserves/accumulated funds reconciliation over a seven year perspective.

2.6.5 Funding compliance measurement

National Treasury requires that the municipality assess its financial sustainability against fourteen different measures that look at various aspects of the financial health of the municipality. These measures are contained in the following table. All the information comes directly from the annual budgeted statements of financial performance, financial position and cash flows. The funding compliance measurement table essentially measures the degree to which the proposed budget complies with the funding requirements of the MFMA. Each of the measures is discussed below.

Description	MFMA	2009/10	2010/11	2011/12		Current Ye	ear 2012/13		2013/14 Medium To	& Expenditure

2.6.5.1 Cash/cash equivalent position

The municipality's forecast cash position was discussed as part of the budgeted cash flow statement. A "positive " cash position, for each year of the MTREF would generally be a minimum requirement, subject to the planned application of these funds such as cash-backing of reserves and working capital requirements.

If the municipality's forecast cash position is negative, for any year of the medium term budget, the budget is very unlikely to meet MFMA requirements or be sustainable and could indicate a risk of non-compliance with section 45 of the MFMA which deals with the repayment of short term debt at the end of the financial year. The forecasted cash and cash equivalents for the 2013/14 MTREF shows R21 million, R21.7 million and R22.5 million for each respective financial year.

2.6.5.2 Cash plus investments less application of funds

The purpose of this measure is to understand how the municipality has applied the available cash and investments as identified in the budgeted cash flow statement. The detail reconciliation of the cash backed reserves/surpluses is contained in MBRR Table A8, on page 26. The reconciliation is intended to be a relatively simple methodology for understanding the budgeted amount of cash and investments available with any planned or required applications to be made. This has been extensively discussed above.

2.6.5.3 Monthly average payments covered by cash or cash equivalents

The purpose of this measure is to understand the level of financial risk should the municipality be under stress from a collection and cash in-flow perspective. Regardless of the annual cash position an evaluation should be made of the ability of the municipality to meet monthly payments as and when they fall due. It is especially important to consider the position should the municipality be faced with an unexpected disaster that threatens revenue collection such as rate boycotts. Notably, the ratio has been declining significantly for the period 2009/10 to 2012/13, moving from 11 to 5 with the 2013/14 MTREF. This measure will have to be carefully monitored going forward.

2.6.5.4 Surplus/deficit excluding depreciation offsets

The main purpose of this measure is to understand if the revenue levels are sufficient to conclude that the community is making a sufficient contribution for the municipal resources consumed each year. An "adjusted" surplus/deficit is achieved by offsetting the amount of depreciation related to externally funded assets. Municipalities need to assess the result of this calculation taking into consideration its own circumstances and levels of backlogs. If the outcome is a deficit, it may indicate that rates and service charges are insufficient to ensure that the community is making a sufficient contribution toward the economic benefits they are consuming over the medium term. For the 2013/14 MTREF the indicative outcome is a surplus of R5.2 million for 2013/14, R22.8 million for 2014/15 and 21.7 million for 2015/16.

2.6.5.5 Property Rates/service charge revenue as a percentage increase less macro inflation target. The purpose of this measure is to understand whether the municipality is contributing appropriately to the achievement of national inflation targets. This measure is based on the increase in "revenue", which will include both the change in the tariff as well as any assumption about real growth such as new property development, services consumption growth etc.

2.6.5.6 Cash receipts as a percentage of ratepayer and other revenue

This factor is a macro measure of the rate at which funds are "collected". This measure is intended to analyse the underlying assumed collection rate for the MTREF to determine the relevance and credibility of the budget assumptions contained in the budget. It can be seen that the outcome is at 90.02, 90.37 and 90.50 per cent for each of the respective financial years.

2.6.5.7 Debt impairment expense as a percentage of billable revenue

This factor measures whether the provision for debt impairment is being adequately funded and is based on the underlying assumption that the provision for debt impairment (doubtful and bad debts) has to be increased to offset under-collection of billed revenues. The provision has been appropriated at 0.98, 0.89 and 0.80 per cent over the MTREF.

2.6.5.8 Capital payments percentage of capital expenditure

The purpose of this measure is to determine whether the timing of payments has been taken into consideration when forecasting the cash position. The municipality aims to stay within strict compliance with the legislative requirement that creditors be paid within 30 days.

2.6.5.9 Borrowing as a percentage of capital expenditure (excluding transfers, grants and contributions) Council will not borrow for the MTREF.

2.6.5.10 Transfers/grants revenue as a percentage of Government transfers/grants available

The purpose of this measurement is mainly to ensure that all available transfers from national and provincial government have been budgeted for. A percentage less than 100 per cent could indicate that not all grants as published in the Division of Revenue Act (DoRA) have been budgeted for. The municipality has budgeted for all transfers.

2.6.5.11 Consumer debtors change (Current and Non-current)

The purpose of these measures are to ascertain whether budgeted reductions in outstanding debtors are realistic. There are 2 measures shown for this factor; the change in current debtors and the change in long term receivables, both from the Budgeted Financial Position. The MTREF shows an increase of 51.8 per cent for 2013/14 and increases of 44.1 per cent and 34.2 per cent for the outer years.

2.6.5.12 Repairs and maintenance expenditure level

This measure must be considered important within the context of the funding measures criteria because a trend that indicates insufficient funds are being committed to asset repair could also indicate that the overall budget is not credible and/or sustainable in the medium to long term because the revenue budget is not being protected. Details of the municipality's strategy pertaining to asset management and repairs and maintenance is contained in MBRR SA34C on pages 69 and 70.

2.6.5.13 Asset renewal/rehabilitation expenditure level

This measure has a similar objective to aforementioned objective relating to repairs and maintenance. A requirement of the detailed capital budget (since MFMA Circular 28 which was issued in December 2005) is to categorise each capital project as a new asset or a renewal/rehabilitation project. The objective is to summarise and understand the proportion of budgets being provided for new assets and also asset sustainability. A declining or low level of renewal funding may indicate that a budget is not credible and/or sustainable and future revenue is not being protected, similar to the justification for "repairs and maintenance" budgets. Further details in this regard are contained in MBRR SA34b on pages 67 and 68.

2.7 Expenditure on grants and reconciliations of unspent funds

MBRR SA19 - Expenditure on transfers and grant programmes

2.10 Contracts having future budgetary implications

In terms of the municipality's Supply Chain Management Policy, no contracts are awarded beyond the medium-term revenue and expenditure framework (three years).

2.11 Capital expenditure details

The following three tables present details of the municipality's capital expenditure programme, firstly on new assets, then the renewal of assets, the repair and maintenance of assets, and finally on depreciation.

2.13 Legislation compliance status

1. In year reporting

Reporting to National Treasury in electronic format was fully complied with on a monthly basis. Section 71 reporting to the Mayor (within 10 working days) was also complied with and includes monthly published financial performance on the municipality's website.

2. Internship programme

The municipality is participating in the Municipal Financial Management Internship programme and has employed two interns undergoing training in various divisions of the Financial Services Department. They have enrolled on a course to comply with the minimum standards.

3. Budget and Treasury Office

The Budget and Treasury Office has been established in accordance with the MFMA.

4. Audit Committee

An Audit Committee has been established and is fully functional

5. Service Delivery and Implementation Plan

The detailed SDBIP document, directly aligned and informed by the 2013/14 MTREF, has been tabled and is ready for approval by the Mayor.

6. Annual Report

The annual report is compiled in terms of the MFMA and National Treasury requirements

7. MFMA Training

MFMA training has not yet commenced.

8. Policies

An amendment of the Municipal Property Rates Regulations as published in Government Notice 363 of 27 March 2009, was announced in Government Gazette 33016 on 12 March 2010. The ratios as prescribed in the Regulations have been complied with.
