Introduction

- a Kareeberg Municipality is situated in the western side of the Pixley ka Seme District Municipality in the Northern Cape Province. The district consists of nine municipalities of which Kareeberg is the second smallest.

The municipality was established through the amalgamation of Carnarvon, Vanwyksvlei and Vosburg, as well as a large area of rural farms. The administrative centre is located in Carnarvon with Vanwyksvlei and Vosburg being rural service centres.

The landscape is typical Karoo with an annual average rainfall of 260mm and an annual evaporation of 230mm. There are no constant rivers running through the municipal area and all towns are dependent on ground water.

Local economic opportunities are sadly lacking in the municipal area with the declining economy being largely based on sheep farming. With an unemployment rate of approximately 61% most of the residents rely heavily on the provision of free basic services.

Population growth has been negative by $\pm 4\%$ over the last ten years. The migration of economically active residents to greater urban areas has a huge impact on the population growth. The total population of the municipality is 9 497, which constitutes 2 417 households.

586 households (population 2 814), are resident in the rural areas whilst 1 831 (population 6 683) resides in the urban areas.

- b Kareeberg Municipality has an ongoing consultative process whereby any stakeholder in the municipality can give input for the budgetary process. The municipality has an open door policy so that the Mayor's office, as well as senior management, are available at any time. After each bi-monthly council meeting a community meeting is held where feedback is given by council as well as where inputs by the community are noted. A monthly newsletter, "Die Korbeeltjie", is delivered to each household free of charge wherein the Mayor gives feedback on council activities and asks for inputs on any matter for better service delivery. Advertisements for inputs during the revision of the IDP as well as the budget process were placed in the local newspaper. No inputs were received.
- c This year's Medium Term Revenue and Expenditure Framework is informed by the municipality's vision of affordable and sustainable service delivery. This budget has been prepared in line with the requirements as set out in Circulars 51, 54 and 55 of National Treasury and complies with the Municipal Budget and Reporting Regulations.
- d Although the municipality will make every effort to collect all revenue due, so that service delivery will not be hampered in any way, the following challenges causes concern:
- Aging and poorly maintained water, roads and electricity infrastructure;
 - The increased cost of bulk electricity (due to tariff increases from Eskom), which is placing upward pressure on service tariffs to residents.
 - Wage increases for municipal staff that continue to exceed consumer inflation

Tariff and property rate increases should be affordable and should generally not exceed inflation as measured by the CPI, except where there are price increases in the inputs of services that are beyond the control of the municipality, for instance the cost of bulk electricity.

Agbare Raadslede

My wetlike verantwoordelikheid vandag is om 'n begroting vir die finansiële boekjaar 2011/2012 aan u voor te lê .

Die voorbereiding van hierdie begroting het op 'n geordende wyse geskied. Vier begrotingskomitee vergaderings het plaasgevind. Haalbare insette van die gemeenskap deur die wykskomitees was ontvang. Voorstelle van staatsdepartemente by Forumvergadering was ontvang. Voorstelle van die opkomende boere in Kareeberg. Voorstelle van die projekbestuurders van die Square Kilometre Array (S.K.A) was ontvang. Die G.O.P / I.D.P Verteenwoordigersforum uit verskillende instansies/organisasies het ook hulle insette gelever (Februarie 2011).

Gemeenskapsdeelname proses in al vier wyke wat gehou was in Vosburg - 11 April 2011, Carnarvon-(wyk 2) - 12 April 2011, Vanwyksvlei -13 April 2011, Carnarvon (wyk 1)–14 April 2011. Dankie vir die bywoning van hierdie vergaderings van die Raad deur die Gemeenskapsdeelname proses in al vier wyke wat gehou was in Vosburg - 11 April 2011, Carnarvon-(wyk 2) - 12 April 2011, Vanwyksvlei -13 April 2011, Carnarvon (wyk 1)–inwoners van Kareeberg .

Soos vorige begrotings het die raad weereens met kundigheid 'n volhoubare aanvaarbare begroting geskep. Daar was in aanmerking geneem, om 'n kwaliteit en volhoubare diens vir almal te lewer, nl. Watervoorsiening, Vullisverwydering, Elektrisiteitsvoorsiening, Sanitasie , Rioolverwydering , Stormwater en Strate.

Agbare Raadslede

Dit was jaarliks ons verantwoordelikheid om aandag te gee wanneer die agbare president van die Republiek van Suid Afrika , President Jacob Zuma sy (State of the Nation address) staatsrede doen, die Agbare Premier van die Noord Kaap, Premier Hazel Jenkins haar (State of the Province address) Provinsiale rede lewer, dat munisipaliteite ook in hulle jaarlikse beplanning moet fokus op Nasionale en Provinsiale vraagstukke.

2011 is deur die President verklaar as die jaar,dat die munisipaliteite moet toesien dat kwaliteit en volhoubare dienste gelever word, werkskepping binne ons gemeenskappe geskep word. Hierdie Raad het voldoen aan hierdie versoek die afgelope 5 jaar.

Skoon administrasie vir Kareeberg Munisipaliteit was vir die afgelope 5 jaar deur die Ouditeur-Generaal in sy jaarlikse verslae bevestig. 2006 het hierdie Raad begin met 'n karige bedryfsbegroting van R 17 miljoen.

Vandag kan hierdie Raad met trots aan u voorhou, as gevolg van deurdagte raadsbesluite, kon hierdie raad gehalte infrastruktuur skep, beter dienslewering, kliëntediens, personeel voorsiening, vlootvervanging en onderhoud. Op 'n gereelde basis het hierdie raad die gemeenskap ingelig deur ons maandelike nuusbrieff , (Die Korbeeltjie), Raad ontmoet die mense program en Imbizo's

Al hierdie voorgenome aktiviteite kon bereik word met n begroting van R 42,968,611-00 sonder om enige addisionele las op inwoners te plaas. Die infassering van die wet op eiendomsbelasting (artikel 14 van 2004) hierdie proses kon die administrasie en die raad suksesvol die afgelope 3 jaar infaseer, beheer en bestuur. Dit het die Raad in staat gestel om op voorskrif van die wet, vrystelling op erfbelasting te gee aan kerke, infrastruktuur, weldaadsorganisasies, en alle inwoners met n huiswaarde minders as R 15,000. Geen bouklousule heffing en toeslag is meer van toepassing op inwoners.

Agbare Raadslede

Die Raad het voortgegaan om sy deernisbeleid volgens die raad se verordeninge aan te pas. Alle huishoudings met 'n inkomste minder as R 2 280.00 per maand, sal kwalifiseer vir 'n subsidie deur die Raad. Huishoudings by informele nedersettings sal alternatiewe energie ontvang nl. 4 liters paraffien en 4 sakke hout. Verder sal alle inwoners buite hierdie inkomste kategorie, ook subsidieer word met hul dienste- en eiendomsbelastingrekenings.

Agbare Raadslede

Die konflik in die midde- en Noord-Afrika, plaas Suid-Afrika se hulpbronne onder druk bv. Olie vir vervaardiging van Petrol en ru-olie vir ander ekonomiese aktiwiteite in Suid-Afrika. Die onverkrygbaarheid van sekere bedryfsprodukte afkomstig van ru-olie. Die prys van ru-olie het drasties verhoog, vandag verkoop ru-olie teen \$109 dollar per vat. Vandag voel ons die verhoging in petrol, diesel en paraffien.

Ondanks die ekonomiese druk van 2008, die onstabiele situasie in Dafour, Kenia, Tanzania en Ghana, en nou 2010/2011 het konflik uitgebrei na die Midde-Afrika (Uganda, Nigeria, Ivoorkus) en Noord-Afrika (Libië, Jemen, Tunisia, Marokko, Saoedi-Arabia), verskaffers van olie. Dus kan kleiner Munisipaliteite soos Kareeberg wat moet al hierdie verhogings absorbeer, sonder om inwoners te benadeel. Hierdie Raad kan dit weereens suksesvol hanteer, om 'n realistiese begroting aan u voor te lê.

3. The Council of Kareeberg Municipality, acting in terms of 75A of the Local Government: Municipal Systems Act (Act 32 of 2000) approves and adopts with effect from 1 July 2011 the tariffs for other services, as set out in Annexure 3.

1.3 Executive Summary

The following table is a consolidated overview of the proposed 2011/12 Medium-term Revenue and Expenditure Framework:

Table 1 Consolidated Overview of the 2011/12 MTREF

R	Adjusted Budget 2010/2011	Budget Year 2011/12	Budget Year +1 2012/13	Budget Year +2 2013/14
Total Operating Revenue	42,697,234	35,076,611	39,283,964	43,628,389
Total Operating Expenditure	33,516,234	38,002,611	42,643,963	47,506,835
Surplus/(Deficit) for the year	9,181,000	(2,926,000)	(3,359,999)	(3,878,446)
Total Capital Expenditure	23,663,000	7,892,000	9,596,000	10,124,000

Total operating revenue has decreased by 17.85 per cent or R7,620 million for the 2011/12 financial year when compared to the 2010/11 Adjustments Budget. For the two outer years, operational revenue will increase by 11.99 and 11.06 per cent respectively, equating to a total revenue growth of R,9 million over the MTREF when compared to the 2010/11 financial year.

Total operating expenditure for the 2011/12 financial year has been appropriated at R38,002 million and translates into a budgeted loss of R2,9 million. When compared to the 2010/11 Adjustments Budget, operational expenditure has grown by 13.39 per cent in the 2011/12 budget and by 12.21 and 11.40 per cent for each of the respective outer years of the MTREF. The deficit for the MTREF is caused by depreciation for assets purchased from Government Grants. The value of the assets are already appropriated to the accumulated Surplus.

The capital budget constitutes the Municipal Infrastructure Grant allocated in the Division of Revenue Bill and the projects align with the Integrated Development Plan.

Revenue generated from rates and services charges forms a significant percentage of the revenue basket for the municipality. Rates and service charge revenues comprise more than half of the total revenue mix. In the 2010/11 financial year, revenue from rates and services charges totalled R16.7 million. This increases to R18,5 million, R21,8 million and R25 million in the respective financial years of the MTREF. This growth can be mainly attributed to the increased share that the sale of electricity contributes to the total revenue mix, which in turn is due to rapid increases in the Eskom tariffs for bulk electricity. The above table includes revenue foregone arising from discounts and rebates associated with the tariff policies of the municipality. Details in this regard are contained in MBRR SA1 (see pages 72 and 73).

Operating grants and transfers total R23.3 million in the 2010/11 financial year. Operating grants constitutes 38,82%, 36,49% and 35,16% of the MTREF, starting with the 2011-2012 budget. The following table gives a breakdown of the various operating grants and subsidies allocated to the municipality over the medium term:

The tariff setting process relating to service charges is set out as follows.

Property Rates

- The first R15 000 of the market value of a property used for residential purposes is excluded from the rate-able value (Section 17(h) of the MPRA).
- The rating of agricultural properties is in the third year of phasing in and is therefore entitled to a discount of 25%.
- Council affords agriculture a further rebate for the following criteria:
 - 5% if no municipal road borders the property;
 - 5% if no sewerage is connected to the property
 - 5% if the municipality does not supply electricity to the property
 - 5% if the municipality does not supply water to the property
 - 5% if the municipality does not supply refuse removal to the property
 - 5% if the owner contributes substantially to job creation
 - 5% if the owner supplies acceptable standard of water services to the farm workers

- 100 per cent rebate will be granted to registered indigents in terms of the Indigent Policy;
- The Municipality may award a 100 per cent grant-in-aid on the assessment rates of rate-able properties of certain classes such as official places of worship, registered welfare organizations, institutions or organizations performing charitable work, sports grounds used for purposes of amateur sport as well as for State infrastructure.

Registered indigents will be awarded one basic levy as well as 10kℓ water consumption per month.

Sale of Electricity and Impact of Tariff Increases

NERSA has announced the revised bulk electricity pricing structure. A 26.71 per cent increase in the Eskom bulk electricity tariff to municipalities will be effective from 1 July 2011. Considering the Eskom increases, the consumer tariff had to be increased by 20 per cent to offset the additional bulk purchase cost from 1 July 2011. Furthermore, it should be noted that given the magnitude of the tariff increase, it is expected to depress growth in electricity consumption, which will have a negative impact on the municipality's revenue from electricity.

It should further be noted that NERSA has advised that a stepped tariff structure needs to be implemented from 1 July 2011. The effect thereof will be that the higher the consumption, the higher the cost per kWh. The aim is to subsidise the lower consumption users (mostly the poor). Because the municipality's electricity tariff structure does not accommodate the stepped up structure, very little statistics could be gathered for implementation. National Treasury has however postponed the tariff structure. This will afford the municipality sufficient time to gather enough statistics for implementation by 1 July 2012.

Overall impact of tariff increases on households

The following table shows the overall expected impact of the tariff increases on a large and small household, as well as an indigent household receiving free basic services. Note that in all instances the overall impact of the tariff increases on household's bills have been kept to between 13.9 and 15.6 per cent, with no increase for indigent households as all services are subsidised. Indigent users are only responsible for over use of electricity and water.

The budgeted allocation for employee related costs for the 2011/12 financial year totals R11,6 million, which equals 30.54 per cent of the total operating expenditure. Based on the three year collective SALGBC agreement, salary increases have been factored into this budget at a percentage increase of 7 per cent for the 2011/12 financial year. An annual increase of 8 per cent and 10 per cent has been included in the two outer years of the MTREF. All vacancies have been filled.

The settlement reached by the SALGBC parties in the salary dispute resulted in a further financial implication on this area of expenditure. It should be noted that the total financial implication could not be determined as the applicable municipal wage curve (representing equal pay for equal work at all municipalities in South Africa) has not been finalised.

The cost associated with the remuneration of councillors is determined by the Minister of Co-operative Governance and Traditional Affairs in accordance with the Remuneration of Public Office Bearers Act, 1998 (Act 20 of 1998). The most recent proclamation in this regard has been taken into account in compiling the municipality's budget. An increase of 5 per cent is budgeted for.

The provision of debt impairment was determined based on an annual collection rate of 90 per cent and the fact that indigents are subsidised fully. A payment rate of more than 100 per cent is expected, therefore the low provision for the MTREF.

Provision for depreciation and asset impairment has been informed by the Municipality's Asset Management Policy. Budget appropriations in this regard total R .75 million for the 2011/12 financial year and equates to 2.3 per cent of the total operating expenditure.

Finance charges consist of the interest owed to employee benefits not cash backed.

Bulk purchases are directly informed by the purchase of electricity from Eskom. The annual price increases have been factored into the budget appropriations and directly inform the revenue provisions. The expenditures include distribution losses.

Other materials comprises of the cost of repairs and maintenance. Although this strategic imperative remains a priority with council, cash flow constraints hamper proper repairs and maintenance. National Treasury requires that repairs and maintenance should not be less than 8 per cent of the write down value of existing property plant and equipment. (financial statements 2009-2010). The municipality's figure is only 3.7 per cent. The assurance is given that repairs and maintenance will be done as needed.

Other expenditure comprises of various line items relating to the daily operations of the municipality. This group of expenditure has also been identified as an area in which cost savings and efficiencies can be achieved. Growth has been limited to 8.82 per cent for 2011/12 and curbed at 6.35 and 4.35 per cent for the two outer years, indicating that significant cost savings have been already realised.

Free Basic Services: Basic Social Services Package

The social package assists households that are poor or face other circumstances that limit their ability to pay for services. To receive these free services the households are required to register in terms of the municipality's Indigent Policy. The registration of indigents are reviewed quarterly. Detail relating to free services, cost of free basis services, revenue lost owing to free basic services as well as basic service delivery measurement is contained in MBRR A10 (Basic Service Delivery Measurement) on pages 27 and 28.

The cost of the social package of the registered indigent households is financed by national government through the local government equitable share received in terms of the annual Division of Revenue Act.

The whole of R7.89 million in the 2011-2012 budget year has been appropriated for the development of infrastructure. In the outer years this amount totals R9.5 million, 99 per cent and R8.6 million, 85.15 per cent respectively for each of the financial years. Waste Water Management receives the highest allocation of R3 million in 2011/12 which equates to 38.01 per cent followed by Road Transport at 36.64 per cent, R2.89 million and then Budget and Treasury at 25.34 per cent, R2 million.

Total new assets represent 63.36 per cent or R5 million of the total capital budget while asset renewal equates to 63.64 per cent or R2.89 million. Further detail relating to asset classes and proposed capital expenditure is contained in MBRR A9 (Asset Management) on pages 26 and 27. In addition to the MBRR Table A9, MBRR Tables SA34a, b, c provides a detailed breakdown of the capital programme relating to new asset construction, capital asset renewal as well as operational repairs and maintenance by asset class.

Furthermore MBRR Table SA36 contains a detailed breakdown of the capital budget per project over the medium-term.

1.7 Annual Budget Tables

The following eighteen pages present the ten main budget tables as required in terms of section 8 of the Municipal Budget and Reporting Regulations. These tables set out the municipality's 2011/12 budget and MTREF as approved by the Council. Each table is accompanied by explanatory notes on the facing page.

Explanatory notes to MBRR Table A1 - Budget Summary

1. Table A1 is a budget summary and provides a concise overview of the municipality's budget from all of the major financial perspectives (operating, capital expenditure, financial position, cash flow, and MFMA funding compliance).
2. The table provides an overview of the amounts approved by Council for operating performance, resources deployed to capital expenditure, financial position, cash and funding compliance, as well as the municipality's commitment to eliminating basic service delivery backlogs.
3. Financial management reforms emphasises the importance of the municipal budget being funded. This requires the simultaneous assessment of the Financial Performance, Financial Position and Cash Flow Budgets, along with the Capital Budget. The Budget Summary provides the key information in this regard:
 - a. The operating surplus/deficit (after Total Expenditure) is negative over the MTREF due to depreciation of assets from Government Grants not being provided for as cash
 - b. Capital expenditure is balanced by capital funding sources, of which
Transfers recognised is reflected on the Financial Performance Budget;
4. The Cash backing/surplus reconciliation shows that the municipality anticipates cash backing to be adequate over the MTREF
5. Even though the Council is placing great emphasis on securing the financial sustainability of the municipality, this is not being done at the expense of services to the poor. The section of Free Services shows that the amount spent on Free Basic Services and the revenue cost of free services provided by the municipality continues to increase.

Explanatory notes to MBRR Table A2 - Budgeted Financial Performance (revenue and expenditure by standard classification)

1. Table A2 is a view of the budgeted financial performance in relation to revenue and expenditure per standard classification. The modified GFS standard classification divides the municipal services into 15 functional areas. Municipal revenue, operating expenditure and capital expenditure are then classified in terms of each of these functional areas which enables the National Treasury to compile „whole of government" reports.

2. Note the Total Revenue on this table includes capital revenues (Transfers recognised – capital) and so does not balance to the operating revenue shown on Table A4.

3. Note that as a general principle the revenues for the Trading Services should exceed their expenditures. The table highlights that this is the case for Electricity, Water and Waste Management functions, but not the Waste Water function.

4. Other functions that show a deficit between revenue and expenditure are being financed from rates revenues as surpluses generated from trading services.

Explanatory notes to MBRR Table A3 - Budgeted Financial Performance (revenue and expenditure by municipal vote)

1. Table A3 is a view of the budgeted financial performance in relation to the revenue and expenditure per municipal vote. This table facilitates the view of the budgeted operating performance in relation to the organisational structure of the municipality. This means it is possible to present the operating surplus or deficit of a vote. The following table is an analysis of the surplus or deficit for the electricity and water trading services.

Table 11 Surplus/(Deficit) calculations for the trading services

The electricity trading surplus is deteriorating over the 2011/12 MTREF from 8.58 per cent or R.578 million in 2011/12 to .51 per cent by 2013/14. This is primarily as a result of the high increases in Eskom bulk purchases. The surplus on the water account remains relatively constant over the MTREF translating into a surplus of 70.8 per cent, 70.46 per cent and 69.76 per cent for each of the respective financial years.

Explanatory notes to Table A4 - Budgeted Financial Performance (revenue and expenditure)

1. Total revenue is R35 million in 2011/12 and escalates to R43.6 million by 2013/14. This represents a year-on-year increase of 12 per cent for the 2012/13 financial year and 11 per cent for the 2013/14 financial year.
2. Revenue to be generated from property rates is R3.9 million in the 2011/12 financial year and increases to R5.7 million by 2013/14 which represents 11.38 per cent of the operating revenue base of the municipality and therefore remains a significant funding source. Tariff increases have been factored in at 0 per cent and 15 per cent for each of the outer years of the MTREF.

3. Services charges relating to electricity, water, sanitation and refuse removal constitutes the biggest component of the revenue basket of the municipality totalling R14.5 million for the 2011/12 financial year and increasing to R19.3 million by 2013/14. For the 2011/12 financial year services charges amount to 41 per cent of the total revenue base and grows by 2 and 1 per cent per annum over the medium-term. This growth can mainly be attributed to the increase in the bulk price of electricity.

4. Transfers recognised – operating includes the local government equitable share and other operating grants from national and provincial government. It needs to be noted that in real terms the grants receipts from national government are declining over the MTREF by 36.49 per cent and 35.16 per cent for the two outer years. The percentage share of this revenue source declines due to the more rapid relative growth in service charge revenues. It still remains the second highest source of cash income for the municipality. This means that the municipality becomes more dependant on Government for funding of operational costs.

The following graph illustrates the major expenditure items per type.

Bulk purchases have significantly increased over the 2007/08 to 2013/14 period escalating from R2 million to R8.8 million. These increases can be attributed to the substantial increase in the cost of bulk electricity from Eskom.

Explanatory notes to Table A5 - Budgeted Capital Expenditure by vote, standard classification and funding source

1. Table A5 is a breakdown of the capital programme in relation to capital expenditure by municipal vote (multi-year and single-year appropriations); capital expenditure by standard classification; and the funding sources necessary to fund the capital budget, including information on capital transfers from national and provincial departments.

2. Single-year capital expenditure has been appropriated at R7.89 million for the 2011/12 financial year and remains relatively constant over the MTREF at levels of R9.59 million and R10.12 million respectively for the two outer years.

3. Unlike multi-year capital appropriations, single-year appropriations relate to expenditure that will be incurred in the specific budget year such as the procurement of vehicles and specialized tools and equipment. The budget appropriations for the two outer years are indicative allocations based on the departmental business plans as informed by the IDP and will be reviewed on an annual basis to assess the relevance of the expenditure in relation to the strategic objectives and service delivery imperatives of the municipality. For the purpose of funding assessment of the MTREF, these appropriations have been included but no commitments will be incurred against single-year appropriations for the two outer-years.

5. The capital programme is funded from national and provincial grants and transfers.

Explanatory notes to Table A6 - Budgeted Financial Position

1. Table A6 is consistent with international standards of good financial management practice, and improves understandability for councillors and management of the impact of the budget on the statement of financial position (balance sheet).
2. This format of presenting the statement of financial position is aligned to GRAP1, which is generally aligned to the international version which presents Assets less Liabilities as "accounting" Community Wealth. The order of items within each group illustrates items in order of liquidity; i.e. assets readily converted to cash, or liabilities immediately required to be met from cash, appear first.
3. MBRR Table A6 is supported by an extensive table of notes (SA3 which can be found on pages 64, 65 and 66) providing a detailed analysis of the major components of a number of items, including:
 - Call investments deposits;
 - Consumer debtors;
 - Property, plant and equipment;
 - Trade and other payables;
 - Provisions non current;
 - Changes in net assets; and
 - Reserves
4. The municipal equivalent of equity is Community Wealth/Equity. The justification is that ownership and the net assets of the municipality belong to the community.
5. Any movement on the Budgeted Financial Performance or the Capital Budget will inevitably impact on the Budgeted Financial Position. As an example, the collection rate assumption will impact on the cash position of the municipality and subsequently inform the level of cash and cash equivalents at year end. Similarly, the collection rate assumption should inform the budget appropriation for debt impairment which in turn would impact on the provision for bad debt. These budget and planning assumptions form a critical link in determining the applicability and relevance of the budget as well as the determination of ratios and financial indicators. In addition the funding compliance assessment is informed directly by forecasting the statement of financial position.

Explanatory notes to Table A7 - Budgeted Cash Flow Statement

1. The budgeted cash flow statement is the first measurement in determining if the budget is funded.

2. It shows the expected level of cash in-flow versus cash out-flow that is likely to result from the implementation of the budget.
3. It can be seen that the cash levels of the municipality fell significantly over the 2007/08 to 2009/10 period owing directly to a net decrease in cash for the 2008/09 financial year of R14.2 million and R5.8 million for the 2009/10 financial year.
4. The approved 2010/11 MTREF provide for a further net decrease in cash of R2.4 million for the 2010/11 financial year. The further decline in cash is due to assets being purchased.

Explanatory notes to Table A8 - Cash Backed Reserves/Accumulated Surplus Reconciliation

1. The cash backed reserves/accumulated surplus reconciliation is aligned to the requirements of MFMA Circular 42 – Funding a Municipal Budget.
2. In essence the table evaluates the funding levels of the budget by firstly forecasting the cash and investments at year end and secondly reconciling the available funding to the liabilities/commitments that exist.
3. The outcome of this exercise would either be a surplus or deficit. A deficit would indicate that the applications exceed the cash and investments available and would be indicative of non-compliance with the MFMA requirements that the municipality's budget must be "funded".
4. Non-compliance with section 18 of the MFMA is assumed because a shortfall would indirectly indicate that the annual budget is not appropriately funded.
5. From the table it can be seen that for the period 2007/08 to 2010/11 the deficit changed from R.13 million to a surplus of R.81 million.
6. As part of the budgeting and planning guidelines that informed the compilation of the 2011/12 MTREF the end objective of the medium-term framework was to ensure the budget is funded aligned to section 18 of the MFMA.

Explanatory notes to Table A9 - Asset Management

1. Table A9 provides an overview of municipal capital allocations for providing for new assets and the renewal of existing assets, as well as spending on repairs and maintenance by asset class.

2. National Treasury has recommended that municipalities should allocate at least 40 per cent of their capital budget to the renewal of existing assets, and allocations to repairs and maintenance should be 8 per cent of PPE. The municipality meets the first recommendation, but fails to do so with repairs and maintenance.

Explanatory notes to Table A10 - Basic Service Delivery Measurement

- Table A10 provides an overview of service delivery levels, including backlogs (below minimum service level), for each of the main services.
- The municipality has no significant backlogs
 - Water services – Every citizen has at least RDP services.
 - Sanitation services – backlog will be reduced by over 70 households during the budget year. The number of households with bucket system will be eradicated by 2011/12. These buckets are used in the informal settlement.
 - Electricity services – backlog will be reduced by 70 households. These households are situated in an Eskom distribution area. Where electricity can not be provided, wood and paraffin is provided as fuel.
 - Refuse services – No backlogs are encountered with this service.
- The budget provides for 1 346 households to be registered as indigent in 2011/12, and therefore entitled to receiving Free Basic Services. A few poor people may migrate into the municipal area, but it will have no significant influence.
- It is anticipated that these Free Basic Services will cost the municipality R4.86 million in 2011/12, increasing to R5.78 million in 2013/14. This is covered by the municipality's equitable share allocation from National Government.

Part 2 –Supporting Documentation

2.1 Overview of the annual budget process

Section 53 of the MFMA requires the Mayor of the municipality to provide general political guidance in the budget process and the setting of priorities that must guide the preparation of the budget. In addition Chapter 2 of the Municipal Budget and Reporting Regulations states that the Mayor of the municipality must establish a Budget Steering Committee to provide technical assistance to the Mayor in discharging the responsibilities set out in section 53 of the Act.

The Budget Steering Committee consists of the Municipal Manager and management of the municipality meeting under the chair of the Mayor.

The primary aim of the Budget Steering Committee is to ensure that the process followed to compile the budget complies with legislation and good budget practices; that there is proper alignment between the policy and service delivery priorities set out in the municipality's IDP and the budget, taking into account the need to protect the financial sustainability of municipality; that the municipality's revenue and tariff setting strategies ensure that the cash resources needed to deliver services are available; and that the various spending priorities of the different municipal departments are properly evaluated and prioritised in the allocation of resources.

- that the process followed to compile the budget complies with legislation and good budget practices;
- that there is proper alignment between the policy and service delivery priorities set out in the municipality's IDP and the budget, taking into account the need to protect the financial sustainability of municipality;
- that the municipality's revenue and tariff setting strategies ensure that the cash resources needed to deliver services are available; and
- that the various spending priorities of the different municipal departments are properly evaluated and prioritised in the allocation of resources.

2.1.1 Budget Process Overview

In terms of section 21 of the MFMA the Mayor is required to table in Council ten months before the start of the new financial year (i.e. in August 2010) a time schedule that sets out the process to revise the IDP and prepare the budget.

The Mayor tabled in Council the required budget time schedule on 18 August 2010. Key dates applicable to the process were:

By 31 August 2010	- Table before council the schedule of key deadlines for the 2011 - 2012 budget
By 30 November 2010	- Budget Steering Committee meeting - Revise the IDP - Workshop with heads of department - Ask inputs from the community
By 31 January 2011	- Budget Steering Committee meeting - Budget for salaries and wages - Identify capital projects from the IDP
By 28 February 2011	- Budget Steering Committee meeting - Compile draft budget - Set preliminary tariffs - Review budget related policies - Finalise the IDP - Make cash flow projections - Finalise the PMS(Measurable Performance Objectives) - Compile the SDBIP
By 31 March 2011	- Budget Steering Committee meeting - Table the draft budget - Prepare and send Treasury questionnaires

By 30 April 2011	<ul style="list-style-type: none"> - Budget Steering Committee meeting - Consider Treasury and other input/ objections
By 31 May 2011	<ul style="list-style-type: none"> - Budget Steering Committee meeting - Finalise the community participation process - Table the budget for adoption - Table the SDBIP to be noted by council - Adopt the budget - Adopt the IDP - Adopt amendments to budget related policies
By 30 June 2011	<ul style="list-style-type: none"> - Mayor approved SDBIP - All performance management contracts completed and signed - Prepare and send Treasury questionnaires

National Treasury, in MFMA Circular 54, advised that municipalities should make a choice between two options of adopting the budget to accommodate the 18 May municipal elections. Council decided that the Kareeberg Municipality would adopt option one - approval of the 2011-2012 MTREF before the municipal elections.

The community participation process will be completed during April 2011 and the budget approved on 29 April 2011

2.1.2 IDP and Service Delivery and Budget Implementation Plan

The municipality's IDP is its principal strategic planning instrument, which directly guides and informs its planning, budget, management and development actions. This framework is rolled out into objectives, key performance indicators and targets for implementation which directly inform the Service Delivery and Budget Implementation Plan. IDP planning links back to priority needs and master planning, and essentially informed the detail operating budget appropriations and three-year capital programme.

2.1.3 Financial Modelling and Key Planning Drivers

The following key factors and planning strategies have informed the compilation of the 2011/12 MTREF:

- Policy priorities and strategic objectives
- Asset maintenance
- Economic climate and trends (i.e inflation, Eskom increases, household debt)
- The approved 2010/11 adjustments budget and performance against the SDBIP
- Cash Flow Management Strategy
- Debtor payment levels
- The need for tariff increases versus the ability of the community to pay for services;
- Improved and sustainable service delivery

2.1.4 Community Consultation

The draft 2011/12 MTREF, as tabled before Council on 29 March 2011 for community consultation, was published on the municipality's website, and hard copies were made available at each of the three offices in Carnarvon, Vanwyksvlei and Vosburg.

All documents in the appropriate format (electronic and printed) were provided to National Treasury, and other national and provincial departments in accordance with section 23 of the MFMA, to provide an opportunity for them to make comments.

2.2 Overview of alignment of annual budget with IDP

The Constitution mandates local government with the responsibility to exercise local developmental and cooperative governance. The eradication of imbalances in South African society can only be realized through a credible integrated developmental planning process. Municipalities in South Africa need to utilise integrated development planning as a method to plan future development in their areas and so find the best solutions to achieve sound long-term development goals. A municipal IDP provides a five year strategic programme of action aimed at setting short, medium and long term strategic and budget priorities to create a development platform, which correlates with the term of office of the political office bearers. The plan aligns the resources and the capacity of a municipality to its overall development aims and guides the municipal budget. An IDP is therefore a key instrument which municipalities use to provide vision, leadership and direction to all those that have a role to play in the development of a municipal area. The IDP enables municipalities to make the best use of scarce resources and speed up service delivery.

Integrated developmental planning in the South African context is amongst others, an approach to planning aimed at involving the municipality and the community to jointly find the best solutions towards sustainable development. Furthermore, integrated development planning provides a strategic environment for managing and guiding all planning, development and decision making in the municipality.

It is important that the IDP developed by municipalities correlate with National and Provincial intent. It must aim to co-ordinate the work of local and other spheres of government in a coherent plan to improve the quality of life for all the people living in that area. Applied to the municipality, issues of national and provincial importance should be reflected in the IDP. A clear understanding of such intent is therefore imperative to ensure that the municipality strategically complies with the key national and provincial priorities.

The aim of this revision cycle was to develop and coordinate a coherent plan to improve the quality of life for all the people living in the area, also reflecting issues of national and provincial importance. One of the key objectives is therefore to ensure that there exists alignment between national and provincial priorities, policies and strategies and the municipality's response to these requirements.

The national and provincial priorities, policies and strategies of importance include amongst others:

- Green Paper on National Strategic Planning of 2009;
- Government Programme of Action;
- Development Facilitation Act of 1995;
- Provincial Growth and Development Strategy (GGDS);
- National and Provincial spatial development perspectives;
- Relevant sector plans such as transportation, legislation and policy;
- National Key Performance Indicators (NKPis);
- Accelerated and Shared Growth Initiative (ASGISA);
- National 2014 Vision;
- National Spatial Development Perspective (NSDP) and
- The National Priority Outcomes.

The Constitution requires local government to relate its management, budgeting and planning functions to its objectives. This gives a clear indication of the intended purposes of municipal integrated development planning. Legislation stipulates clearly that a municipality must not only give effect to its IDP, but must also conduct its affairs in a manner which is consistent with its IDP.

The following table highlights the IDP's five strategic objectives for the 2011/12 MTREF and further planning refinements that have directly informed the compilation of the budget:

2.3.1 Performance indicators and benchmarks

2.3.1.1 Borrowing Management

The municipality does not foresee any borrowing during the MTREF.

2.3.1.2 Safety of Capital

The debt-to-equity ratio is a financial ratio indicating the relative proportion of equity and debt used in financing the municipality's assets. The indicator is based on the total of loans, creditors, overdraft and tax provisions as a percentage of funds and reserves.

The debt-to-equity ratio is 24.3, 23.6 and 27.3 over the MTREF.

2.3.1.3 Liquidity

Current ratio is a measure of the current assets divided by the current liabilities. For the 2011/12 MTREF the current ratio is 2 in the 2011/12 financial year and 1.9 for the two outer years of the MTREF. Going forward it will be necessary to maintain these levels.

The liquidity ratio is a measure of the ability of the municipality to utilize cash and cash equivalents to erase or redeem its current liabilities immediately. Ideally the municipality should have the equivalent cash and cash equivalents on hand to meet at least the current liabilities, which should translate into a liquidity ratio of 1. Anything below 1 indicates a shortage in cash to meet creditor obligations. For the 2010/11 financial year the ratio was 1.3 and it has increased to 2 in the 2011/12 financial year.

2.3.1.4 Revenue Management

The revenue value chain must be streamlined by ensuring accurate billing, customer service, credit control and debt collection.

2.3.1.5 Creditors Management

The municipality has managed to ensure that creditors are settled within the legislated 30 days of invoice. By applying daily cash flow management the municipality has managed to ensure a 100 per cent compliance rate to this legislative obligation.

2.3.1.6 Other Indicators

The electricity distribution losses have been managed downwards from 16 per cent in the 2010/11 financial year to 13 per cent over the MTREF. The initiatives to ensure these targets are achieved include managing illegal connections and theft of electricity.

Employee costs as a percentage of operating revenue continues to decrease over the MTREF. This is primarily owing to the high increase in bulk purchases which directly increase revenue levels, as well as increased allocation relating to operating grants and transfers.

Similar to that of employee costs, repairs and maintenance as percentage of operating revenue is also decreasing owing directly to cost drivers such as bulk purchases increasing far above inflation.

2.3.2 Free Basic Services: basic social services package for indigent households

The social package assists residents that have difficulty paying for services and are registered as indigent households in terms of the Indigent Policy of the Municipality. Only registered indigents qualify for the free basic services.

For the 2011/12 financial year 1 346 registered indigents have been provided for in the budget. In terms of the municipality's indigent policy registered households are entitled to 10kℓ free water, 50 kwh of electricity, 1 sanitation removal and free waste removal once a week, as well as a discount on their property rates.

Further detail relating to the number of households receiving free basic services, the cost of free basic services, highest level of free basic services as well as the revenue cost associated with the free basic services is contained in MBRR Table A10 (Basic Service Delivery Measurement) on page 27.

Note that the number of households in informal areas that receive free services and the cost of these services (e.g. the provision of water through stand pipes, etc) are not taken into account in the table noted above.

2.5 Overview of budget assumptions

2.5.1 External factors

Due to the economic slowdown, financial resources are limited due to reduced payment levels by consumers. This has resulted in declining cash inflows, which has necessitated restrained expenditure to ensure that cash outflows remain within the affordability parameters of the municipality's finances.

2.5.2 General inflation outlook and its impact on the municipal activities

There are five key factors that have been taken into consideration in the compilation of the 2011/12 MTREF:

- National Government macro economic targets;
- The general inflationary outlook and the impact on municipality's residents and businesses;
- The impact of municipal cost drivers;
- The increase in prices for bulk electricity; and

- The increase in the cost of remuneration. Employee related costs comprise 29.53 per cent of total operating expenditure in the 2011/11 MTREF and therefore this increase above inflation places a disproportionate upward pressure on the expenditure budget. The wage agreement SALGBC concluded with the municipal workers unions on 31 July 2009 as well as the categorisation and job evaluation wage curves collective agreement signed on 21 April 2010 must be noted.

2.5.3 Collection rate for revenue services

The base assumption is that tariff and rate increases will increase at a rate slightly higher than CPI over the long term. It is also assumed that current economic conditions, and relatively controlled inflationary conditions, will continue for the forecasted term.

The rate of revenue collection is currently expressed as a percentage (90 per cent) of annual billings. Cash flow is assumed to be 90 per cent of billings, plus an increased collection of arrear debt from the revised collection and credit control policy. The performance of arrear collections will however only be considered a source of additional cash in-flow once the performance has been carefully monitored.

2.5.4 Salary increases

The collective agreement regarding salaries/wages came into operation on 1 July 2009 and shall remain in force until 30 June 2012. Year three provides for a wage increase based on the average CPI for the period 1 February 2010 until 31 January 2011, plus 2 per cent. The average CPI for this period is 4.08 per cent.

2.5.5 Ability of the municipality to spend and deliver on the programmes

It is estimated that a spending rate of 100 per cent is achieved on operating expenditure as well as on the capital programme for the 2011/12 MTREF of which performance has been factored into the cash flow budget.

2.6.3 Cash Flow Management

Cash flow management and forecasting is a critical step in determining if the budget is funded over the medium-term. The table below is consistent with international standards of good financial management practice and also improves understandability for councillors and management. Some specific features include:

- Clear separation of receipts and payments within each cash flow category; and
- Clear separation of capital and operating receipts from government, which also enables cash from „Ratepayers and other“ to be provide for as cash inflow based on actual performance. In other words the actual collection rate of billed revenue.

It needs to be noted that there is a steady outflow of cash since 2007/08 till 2013/14

2.6.4 Cash Backed Reserves/Accumulated Surplus Reconciliation

This following table meets the requirements of MFMA Circular 42 which deals with the funding of a municipal budget in accordance with sections 18 and 19 of the MFMA. The table seeks to answer three key questions regarding the use and availability of cash:

- What are the predicted cash and investments that are available at the end of the budget year?
- How are those funds used?
- What is the net funds available or funding shortfall?

A surplus would indicate the cash-backed accumulated surplus that was/is available. A shortfall (applications > cash and investments) is indicative of non-compliance with section 18 of the MFMA requirement that the municipality's budget must be „funded“. Non-compliance with section 18 is assumed because a shortfall would indirectly indicate that the annual budget is not appropriately funded (budgeted spending is greater than funds available or to be collected). It is also important to analyse trends to understand the consequences, e.g. the budget year might indicate a small surplus situation, which in itself is an appropriate outcome, but if in prior years there were much larger surpluses then this negative trend may be a concern that requires closer examination.

2.6.5 Funding compliance measurement

National Treasury requires that the municipality assess its financial sustainability against fourteen different measures that look at various aspects of the financial health of the municipality. These measures are contained in the following table. All the information comes directly from the annual budgeted statements of financial performance, financial position and cash flows. The funding compliance measurement table essentially measures the degree to which the proposed budget complies with the funding requirements of the MFMA. Each of the measures is discussed below.

2.6.5.1 Cash/cash equivalent position

The municipality's forecast cash position was discussed as part of the budgeted cash flow statement. A „positive“ cash position, for each year of the MTREF would generally be a minimum requirement, subject to the planned application of these funds such as cash-backing of reserves and working capital requirements.

If the municipality's forecast cash position is negative, for any year of the medium term budget, the budget is very unlikely to meet MFMA requirements or be sustainable and could indicate a risk of non-compliance with section 45 of the MFMA which deals with the repayment of short term debt at the end of the financial year. The forecasted cash and cash equivalents for the 2011/12 MTREF shows R30.8 million, R29.8 million and R28.6 million for each respective financial year.

2.6.5.2 Cash plus investments less application of funds

The purpose of this measure is to understand how the municipality has applied the available cash and investments as identified in the budgeted cash flow statement. The detail reconciliation of the cash backed reserves/surpluses is contained in MBRR Table A8, on page 24. The reconciliation is intended to be a relatively simple methodology for understanding the budgeted amount of cash and investments available with any planned or required applications to be made. This has been extensively discussed above.

2.6.5.3 Monthly average payments covered by cash or cash equivalents

The purpose of this measure is to understand the level of financial risk should the municipality be under stress from a collection and cash in-flow perspective. Regardless of the annual cash position an evaluation should be made of the ability of the municipality to meet monthly payments as and when they fall due. It is especially important to consider the position should the municipality be faced with an unexpected disaster that threatens revenue collection such as rate boycotts. Notably, the ratio has been falling significantly for the period 2007/08 to 2010/11, moving from 18 to 10 with the adopted 2010/11 MTREF. The ratio moves upwards to 11 and then reduces slightly to 9 and 8 for the outer years. This measure will have to be carefully monitored going forward.

2.6.5.4 Surplus/deficit excluding depreciation offsets

The main purpose of this measure is to understand if the revenue levels are sufficient to conclude that the community is making a sufficient contribution for the municipal resources consumed each year. An „adjusted“ surplus/deficit is achieved by offsetting the amount of depreciation related to externally funded assets. Municipalities need to assess the result of this calculation taking into consideration its own circumstances and levels of backlogs. If the outcome is a deficit, it may indicate that rates and service charges are insufficient to ensure that the community is making a sufficient contribution toward the economic benefits they are consuming over the medium term. For the 2011/12 MTREF the indicative outcome is a surplus of R4.9 million, R6.2 million for both outer years.

2.6.5.5 Property Rates/service charge revenue as a percentage increase less macro inflation target

The purpose of this measure is to understand whether the municipality is contributing appropriately to the achievement of national inflation targets. This measure is based on the increase in „revenue“, which will include both the change in the tariff as well as any assumption about real growth such as new property development, services consumption growth etc.

2.6.5.6 Cash receipts as a percentage of ratepayer and other revenue

This factor is a macro measure of the rate at which funds are „collected“. This measure is intended to analyse the underlying assumed collection rate for the MTREF to determine the relevance and credibility of the budget assumptions contained in the budget. It can be seen that the outcome is at 84.1, 86.4 and 88.1 per cent for each of the respective financial years.

2.6.5.7 Debt impairment expense as a percentage of billable revenue

This factor measures whether the provision for debt impairment is being adequately funded and is based on the underlying assumption that the provision for debt impairment (doubtful and bad debts) has to be increased to offset under-collection of billed revenues. The provision has been appropriated at 1.18, 1.05 and .97 per cent over the MTREF.

2.6.5.8 Capital payments percentage of capital expenditure

The purpose of this measure is to determine whether the timing of payments has been taken into consideration when forecasting the cash position. The municipality aims to stay within strict compliance with the legislative requirement that creditors be paid within 30 days.

2.6.5.9 Borrowing as a percentage of capital expenditure (excluding transfers, grants and contributions)

Council will not borrow for the MTREF.

2.6.5.10 Transfers/grants revenue as a percentage of Government transfers/grants available

The purpose of this measurement is mainly to ensure that all available transfers from national and provincial government have been budgeted for. A percentage less than 100 per cent could indicate that not all grants as published in the Division of Revenue Act (DoRA) have been budgeted for. The municipality has budgeted for all transfers.

2.6.5.11 Consumer debtors change (Current and Non-current)

The purpose of these measures are to ascertain whether budgeted reductions in outstanding debtors are realistic. There are 2 measures shown for this factor; the change in current debtors and the change in long term receivables, both from the Budgeted Financial Position. The MTREF shows a decrease of 48.5 per cent for 2011/12 and an increase of 20.4 per cent and 16.1 per cent for the outer years.

2.6.5.12 Repairs and maintenance expenditure level

This measure must be considered important within the context of the funding measures criteria because a trend that indicates insufficient funds are being committed to asset repair could also indicate that the overall budget is not credible and/or sustainable in the medium to long term because the revenue budget is not being protected. Details of the municipality's strategy pertaining to asset management and repairs and maintenance is contained in MBRR SA34C on page 68.

2.6.5.13 Asset renewal/rehabilitation expenditure level

This measure has a similar objective to aforementioned objective relating to repairs and maintenance. A requirement of the detailed capital budget (since MFMA Circular 28 which was issued in December 2005) is to categorise each capital project as a new asset or a renewal/rehabilitation project. The objective is to summarise and understand the proportion of budgets being provided for new assets and also asset sustainability. A declining or low level of renewal funding may indicate that a budget is not credible and/or sustainable and future revenue is not being protected, similar to the justification for „repairs and maintenance“ budgets. Further details in this regard are contained in MBRR SA34b on pages 66 and 67.

MBRR SA37 - Projects delayed from previous financial year

The municipality has no projects that will be delayed from the previous year.

2.12 Legislation compliance status

Compliance

1. In year reporting

Reporting to National Treasury in electronic format was fully complied with on a monthly basis. Section 71 reporting to the Mayor (within 10 working days) was also complied with and includes monthly published financial performance on the municipality's website.

2. Internship programme

The municipality is participating in the Municipal Financial Management Internship programme and has employed two interns undergoing training in various divisions of the Financial Services Department.

3. Budget and Treasury Office

The Budget and Treasury Office has been established in accordance with the MFMA.

4. Audit Committee

An Audit Committee has been established and is fully functional

5. Service Delivery and Implementation Plan

The detailed SDBIP document, directly aligned and informed by the 2011/12 MTREF, has been tabled and is ready for approval by the Mayor.

6. Annual Report

The annual report is compiled in terms of the MFMA and National Treasury requirements

7. MFMA Training

MFMA training has not yet commenced.

8. Policies

An amendment of the Municipal Property Rates Regulations as published in Government Notice 363 of 27 March 2009, was announced in Government Gazette 33016 on 12 March 2010. The ratios as prescribed in the Regulations have been complied with.
